Anritsu Ms2721b User Manual:

Next Generation Data Technologies for Collective Computational Intelligence Nik Bessis, Fatos Xhafa, 2011-04-28

This book focuses on next generation data technologies in support of collective and computational intelligence. The book brings various next generation data technologies together to capture, integrate, analyze, mine, annotate, and visualize distributed data made available from various community users in a meaningful and collaborative for the organization manner. A unique perspective on collective computational intelligence is offered by embracing both theory and strategies fundamentals such as data clustering, graph partitioning, collaborative decision making, self adaptive ant colony swarm and evolutionary agents. It also covers emerging and next generation technologies in support of collective computational intelligence such as Web 2.0, social networks, semantic web for data annotation, knowledge representation and inference, data privacy and security, and enabling distributed and collaborative paradigms such as P2P Grid and Cloud Computing due to the geographically dispersed and distributed nature of the data. The book aims to cover in a comprehensive manner the combinatorial effort of utilizing and integrating various next generations collaborative and distributed data technologies for computational intelligence in various scenarios. The book also distinguishes itself by assessing whether utilization and integration of next generation data technologies can assist in the identification of new opportunities which may also be strategically fit for purpose.

Wireless Sensor Networks Bhaskar Krishnamachari, 2010-03-02 This book constitutes the refereed proceedings of the 7th European Conference on Wireless Sensor Networks EWSN 2010 held in Coimbra Portugal in February 2010. The 21 revised full papers presented were carefully reviewed and selected from 109 submissions. Topics of interest include hardware design and implementation, operating systems and software, middleware and macroprogramming, communication and network protocols, information and signal processing, fundamental theoretical limits and algorithms, prototypes, field experiments, testbeds, novel applications including urban sensing, security and fault tolerance. The papers are organized in topical sections on localization, synchronization and compression, networking, new directions, programming and architecture as well as on link reliability.

Low Power Semiconductor Devices and Processes for Emerging Applications in Communications, Computing, and Sensing Sumeet Walia, 2018-08-06

The book addresses the need to investigate new approaches to lower energy requirement in multiple application areas and serves as a guide into emerging circuit technologies. It explores revolutionary device concepts, sensors and associated circuits and architectures that will greatly extend the practical engineering limits of energy efficient computation. The book responds to the need to develop disruptive new system architectures and semiconductor processes aimed at achieving the highest level of computational energy efficiency for general purpose computing systems. Discusses unique technologies and material only available in specialized journal and conferences. Covers emerging materials and device structures such as ultra low power technologies, nanoelectronics and microsystem manufacturing. Explores semiconductor processing and manufacturing, device design and
