**Operational Risk Assessment** Brendon Young, Rodney Coleman, 2010-12-03 Operational risk assessment The Commercial Imperative of a More Forensic and Transparent Approach Brendon Young and Rodney Coleman Brendon Young and Rodney Coleman's book is extremely timely There has never been a greater need for the financial industry to reassess the way it looks at risk They are right to draw attention to the current widespread practices of risk management which have allowed risk to become underpriced across the entire industry Rt Hon John McFall MP Chairman House of Commons Treasury Committee Failure of the financial services sector to properly understand risk was clearly demonstrated by the recent credit crunch In its 2008 Global Stability Report the IMF sharply criticised banks and other financial institutions for the failure of risk management systems resulting in excessive risk taking Financial sector supervision and regulation was also criticised for lagging behind shifts in business models and rapid innovation This book provides investors with a sound understanding of the approaches used to assess the standing of firms and determine their true potential identifying probable losers and potential longer term winners It advocates a more forensic approach towards operational risk management and promotes transparency which is seen as a facilitator of competition and efficiency as well as being a barrier to fraud corruption and financial crime Risk assessment is an integral part of informed decision making influencing strategic positioning and direction It is fundamental to a company's performance and a key differentiator between competing management teams Increasing complexity is resulting in the need for more dynamic responsive approaches to the

assessment and management of risk Not all risks can be quantified however it remains incumbent upon management to determine the impact of possible risk events on financial statements and to indicate the level of variation in projected figures To begin the book looks at traditional methods of risk assessment and shows how these have developed into the approaches currently being used It then goes on to consider the more advanced forensic techniques being developed which will undoubtedly increase understanding The authors identify best practice and address issues such as the importance of corporate governance culture and ethics Insurance as a mitigant for operational risk is also considered Quantitative and qualitative risk assessment methodologies covered include Loss data analysis extreme value theory causal analysis including Bayesian Belief Networks control risk self assessment and key indicators scenario analysis and dynamic financial analysis Views of industry insiders from organisations such as Standard Poors Fitch Hermes USS UN PRI Deutsche Bank and Alchemy Partners are presented together with those from experts at the FSA the International Accounting Standards Board IASB and the Financial Reporting Council In addition to investors this book will be of interest to actuaries rating agencies regulators and legislators as well as to the directors and risk managers of financial institutions in both the private and public sectors Students requiring a comprehensive knowledge of operational risk management will also find the book of considerable value

Committee on the Judiciary, 1980 **Cognitive and affective control** Gilles Pourtois, Wim Notebaert, Tom Verguts, Traditionally cognition and emotion are seen as separate domains that are independent at best and in competition at worst The French scientist and philosopher Blaise Pascal 1623 1662 famously said *Le coeur a ses raisons que la raison ne connaît point* The heart has its reasons that reason does not know Over the last century however psychologists and neuroscientists have increasingly appreciated their very strong reciprocal connections and interactions Initially this was demonstrated in cognitive functions such as attention learning and memory and decision making For instance an emotional stimulus captures attention e.g. Anderson Verguts Notebaert 2009 From this perspective cognitive control is not a cool encapsulated executive function but instead involves rapidly calculating the value of situational contextual and action cues Rushworth Behrens 2008 for the purpose of adapting the cognitive system toward future optimal

performance A wide array of research has shed light on cognitive control and its interactions with affect or motivation Behaviorally important phenomena include how people respond to difficult stimuli e g incongruent stimuli task switches negative feedback or errors and how this influences subsequent task processing Neurally an important target structure has been the anterior cingulate cortex ACC and its connections to traditional emotional e g amygdala and cognitive areas e g pre motor cortex dorsolateral prefrontal cortex ACC seems to play a predominant role in integrating distant effects from remote cognitive and emotion systems in order to guide and optimize behavior The current special issue focuses on the bi directional link between emotion and cognitive control We invite studies that investigate the influence from emotion on cognitive control or vice versa the influence of cognitive control on emotion Contributions can be of different types We welcome empirical contributions behavioral or neuroscientific but also computational modeling theory or review papers By bringing together researchers from the traditionally separated domains we hope to further stimulate the crosstalk between emotion and cognitive control and thus to deepen our understanding of both
