Lucid Waking: The Answer to the Problem of Consciousness Jack Tanner, 2021-07-27 There is no problem more baffling to the academic world than the problem of consciousness It's fair to say that no academic has any clue at all about what consciousness is In fact academics have totally confused it with something radically different namely sentience The problem that faces the academic world is the insurmountable one of how you get lifeless mindless purposeless objects material atoms to manifest subjectivity It's a category error to imagine that matter can provide any answers to the foundational issues of mind Academics believe that to answer the problem of subjectivity is thereby to solve the hard problem of consciousness In fact the problem of subjectivity sentience is totally different from the problem of consciousness To understand why simply ponder all of the following statements 1 animals are sentient but not conscious 2 human babies are sentient but not conscious 3 humans who never encountered another human are sentient but not conscious 4 sleepwalking humans are sentient but not conscious The problem of sentience is drastically different from the problem of consciousness

and if you conflate the two you have immediately set yourself an impossible task especially if you make any attempt to solve these problems within the framework of materialism i.e. the ideology of anti mind To understand what consciousness actually is it's essential to understand the difference in the world of sleep between dreaming and lucid dreaming Exactly the same dichotomy is present in the waking world A sleepwalker is a person who can do complex tasks such as riding a motorbike for half an hour without any consciousness A conscious version of a sleepwalker engages in what we refer to as lucid waking Lucid waking is the key to consciousness The fact is that consciousness is not an inherent property of human individuals It's not built into them It's acquired just as some people acquire the ability to become lucid dreamers Since sleepwalkers could do many of the same things as conscious individuals the question is invited of why consciousness is required at all If you don't know what consciousness is how can you expand your consciousness to the maximum Wouldn't you like to be maximally conscious Think of the power you would have
