Structural Analysis of Historical Constructions contains about 160 papers that were presented at the IV International Seminar on Structural Analysis of Historical Constructions that was held from 10 to 13 November 2004 in Padova Italy. Following publications of previous seminars that were organized in Barcelona Spain 1995 and 1998 and Guimarães Portugal 2001, state of the art information is presented in these two volumes on the preservation, protection and restoration of historical constructions, both comprising monumental structures and complete city centers. These two proceedings volumes are devoted to the possibilities of numerical and experimental techniques in the maintenance of historical structures. In this respect, the papers originating from over 30 countries are subdivided in the following areas: Historical aspects and general methodology; Materials and laboratory testing; Non destructive testing and inspection techniques; Dynamic behavior and structural monitoring; Analytical and numerical approaches; Consolidation and strengthening techniques; Historical timber and metal structures; Seismic analysis and vulnerability assessment; Seismic strengthening and innovative systems; Case studies.
