Schreiner, 2025-04-15 In the Schreiner household conversations about creation evolution and ecology happen more often than normal Schreiner teaches biblical studies and his brother in law is a biologist And both teach at institutions of Christian higher education However when Schreiner's family was able to take a trip to Galapagos Islands in 2023 and 2024 his interpretive conclusions on the

Bible's creation texts shifting positions on ecology and general moral responsibility as a Christian collided in a palpable way. Inspired by a range of experiences from mingling with sea lions to taking water ferries across the Pacific to snorkeling with sharks, Schreiner jovially shares experiences and musings that testify to his shifting positions on these matters: his frustrations with the usual conversations and whether he thinks there can be true irenic conversation between Christians and scientists. Informed, blunt, sometimes snarky but always honest, Schreiner's musings will likely resonate with anyone who travels with their family or wants to be honest about the many variables that must inform a Christian's position on issues of creation, evolution, and ecology. *The True Account of Adam & Eve* Ken Ham, 2012. When you unlock the door to biblical compromise, the door gets pushed open wider with each generation. The Church is now debating the validity of Genesis as actual history, the reality of hell itself, and even if Adam was a real person. Trying to change the biblical time line to fit with the secular concepts of millions of years has led many in Christian academia to reject the literal interpretation of the Bible itself. Perfect for children, the book helps them discover the truth about the first man and woman and how their disobedience led to the need for Jesus Christ. *Deep Time in Genesis* Steven R. Webb, 2016-03-31. The early chapters of Genesis have generated a battleground between people that believe the Earth is very young, on the order of 6000 years, and those that believe it is much older. What has been mostly missing from this battle are the observations of professional Christian geologists. Webb invites you to join his world to see the kind of work that geologists do that leads them to draw certain conclusions on this subject. It is written in laymen's language and is designed to unite a variety of issues ranging from Noah's Flood to dinosaurs to early hominids to the Garden of Eden, etc., while maintaining the integrity of Scripture. *The God of Monkey Science* Janet Kellogg Ray, 2023-10-10. How to hold true to your faith and embrace modern science. Ever since the Scopes Monkey Trial in the early twentieth century, American evangelicals have considered scientists public enemy #1. But this antipathy to modern science turned deadly during the COVID-19 crisis when white evangelicals snubbed precautions and vaccines. Herself an evangelical Christian and a science educator, Janet Kellogg Ray explains how we got here and how to fix it. As the follow-up to *Baby Dinosaurs on the Ark*, this lively volume covers evolution as well as the coronavirus pandemic, vaccines, climate change, and the frontiers of genetic research. Ray explains the facts accessibly and with verve. Along the way, she vividly narrates the scientific achievements and political and religious drama that got us to where we are today. Ultimately, Ray calls for evangelicals to speak to science rather than deny it. We need Christian ethics now more than ever to determine how best to act in light of current scientific data and for love of neighbor. If you're afraid of science hurting your faith, this book will show you how to be true to both. Ethics, Law and the Business of Being Human Charles Foster, 2025-09-02 This book presents an inquiry into the sort of creatures we are If we don't know what we are we can have no idea how to behave or thrive either as individuals or as a society This book in a series of short essays addresses the most fundamental question facing each of us We are not here long how then should we live as individuals and as members of society Philosophers and lawyers have long asked the question but their answers are often garbled and they have not learned a language in which to talk to one another The Academy which should lead the debate is often too riddled with presumption and systemic dysfunction to be either useful or interesting Foster surveys the academic and legal landscape critically and suggests how some of the ills can be remedied
