

Air sweeps direct cooling air around the cylinder head so that the XT350 does not lose efficiency and power even under extended high-rpm running.

A 12-liter tank gives the XT350 plenty of range and the 651mm seat height means that the rider can still get a foot down in traffic or tricky off-road situations. Tank and seat are integrated, motorcross-style, to give the off-road rider both protection and freedom of movement.

Ultra-reliable 12-volt electrical system powers the rectangular 45/40W halogen headlight. Compact tail & brake light combination is neatly built into the rear fender while turn indicators are flush-mounted. Full instrumentation, including speedometer, tachometer and indicator lamps, is housed in a compact meter panel.

Loading-side forks have air-assisted springing and slide smoothly in the Metal basket and low-friction dust seals to provide 210mm of wheel movement. Taper roller bearings at the steering head mean smooth action and a wide steering angle permits extra manoeuvrability in tight terrain.

Low unsprung weight aids suspension action and is achieved by the use of alloy rims, hollow wheel spokes and central hubs. The 21-inch front wheel and 18-inch rear are shod with special all-terrain tyres.

The large-capacity exhaust pipe is routed neatly through the frame to gain extra ground clearance. It has a special alloy undercoating to prevent rust.

Folding gear and brake pedals lessen the chance of breakage in the event of an off-road spill.

The six-speed transmission has specially selected ratios that match both the power characteristics of the engine and the different potential uses of the bike. First gear is very low, for tight off-road work, while the top five ratios are closely spaced to keep the engine pulling strongly. Electronic ignition is preset for exact timing, is ultra-reliable and needs neither maintenance nor adjustment.
