Dystopia and Dispossession in the Hollywood Science Fiction Film, 1979-2017 Harry Warwick, 2023-02-15 Offering a survey of Hollywood science fiction cinema from 1979 to 2017 from Ridley Scott's Alien to Denis Villeneuve's Blade Runner 2049 Dystopia and Dispossession in the Hollywood Science Fiction Film argues that the trajectory of Hollywood's dystopianism in that period is inextricable from the phenomenon of the new enclosures the new dispossessions and privatisations sweeping across the United States since the 1970s More precisely it contends that the critiques of such dispossessions elaborated before the turn of the century consider the satire of private policing in RoboCop 1987 the portrayal of commodified air in Total Recall 1990 and the nightmarish extrapolations of postmodern urbanism in Blade Runner 1982 and The Truman Show 1998 begin to disappear in films such as The Matrix 1999 The Island 2005 District 9 2009 Repo Men 2010 and The Purge 2013 the further commodification of land forest reservoir ideas even the human genome having diminished the contrast between capitalist and non-capitalist spaces on which the earlier critiques depended Bringing close readings of blockbuster films into dialogue with historical and theoretical scholarship on dispossession Dystopia and Dispossession in the Hollywood Science Fiction Film proposes a new understanding of the politics of science fiction in particular and utopian thought in general

Transhumanist Dreams and Dystopian Nightmares Maxwell J. Mehlman, 2012-10-01 What will happen when technology allows us to direct our own evolution Transhumanists advocate for the development and distribution of technologies that will enhance human intellectual physical and psychological capacities even eliminate aging What if the dystopian futures and transhumanist utopias found in the pages of science journals Margaret Atwood novels films like *Gattaca* and television shows like *Dark Angel* are realized What kind of world would humans have created Maxwell J Mehlman considers the promises and perils of using genetic engineering in an effort to direct the future course of human evolution He addresses scientific and ethical issues without choosing sides in the dispute between transhumanists and their challengers However *Transhumanist Dreams and Dystopian Nightmares* reveals that radical forms of genetic engineering could become a reality much sooner than many people think and that we need to encourage risk management efforts Whether scientists are dubious or optimistic about the prospects for directed evolution they tend to agree on two things First however long it takes to perfect the necessary technology it is inevitable that humans will attempt to control their evolutionary future and second in the process of learning how to direct evolution we are bound to make mistakes Our responsibility is to learn how to balance innovation with caution
