Functional Descriptions Ruqaiya Hasan, Carmel Cloran, David Butt, 1996-01-01 This volume focuses on the relation between theory and description by examining aspects of transitivity in different languages Transitivity or case grammar to use the popular term has always occupied a centre stage position in linguistics not least because of its supposedly privileged relation to states of affairs in the real world Using a systemic functional perspective the ten papers in this volume make a contribution to this scholarship by focusing on the transitivity patterns in language as the expression of the experiential metafunction Through a study of different languages English Dutch German Finnish Chinese and Pitjantjatjara the contributors provide functional descriptions of the various categories of process their participants and circumstances including phenomena such as di transitivity causativity the get passive etc With the relation between theories and descriptions running through the ten chapters of this volume as sometimes an overt and sometimes a covert theme the chapters point to the nature of the linguistic fact which is linked ineluctably on the one hand to the nature of the theory and on the other to the speakers experience of the world in which they live The majority of papers included in the volume derive from the 19th International Systemic Functional Congress at Macquarie University

linguistics Invitation to Systemic Functional Linguistics Through the Cardiff Grammar Robin Fawcett, 2008-07 This short book is intended for two groups of readers and so is two books in one First it is a genuinely introductory introduction to Systemic Functional Grammar SFG for the 21st century But this is also a book for experienced linguists who are interested in a scholarly comparison of the two main current versions of SFG the Sydney Grammar and the Cardiff Grammar e g teachers of the first group of readers **Linguistics & Biblical Exegesis** Douglas Mangum, Josh Westbury, 2017-11-01 We rarely think about the way languages work because communicating in our native tongue comes so naturally to us The Bible was written in ancient Hebrew Aramaic and Greek languages no modern reader can claim to have a native understanding of A better understanding of how language works should help us understand the Bible better as we seek to discern the original intent and meaning of each biblical author In this book you will get a basic introduction to the field of linguistics its history its key concepts its major schools of thought and how its insights can shed light on various problems in biblical Hebrew and Greek Numerous examples illustrate linguistic concepts and technical terminology is clearly defined Learn how the study of language can enhance your Bible study **Finding the Synoptic Gospels' Construction Process** Hojoon Ahn, 2024-06-11 This study critically examines the current state of Synoptic Gospel studies particularly many scholars reliance on the Literary Dependence Hypothesis and endeavors to advance a more balanced approach The author attempts to deduce the Synoptic Gospels construction process by meticulously examining the Eucharist and its co text within these Gospels by employing a model of Mode Register Analysis based on Systemic Functional Linguistics This study uncovers the probability that each designated text in the Synoptic Gospels was constructed based on oral Gospel traditions under the influence of each constructor's identity Coherence and the Textual Function in "The Curious Incident of the Dog in the Night-time" Marieke Jochimsen, 2010-04 Seminar paper from the year 2008 in the subject English Language and Literature Studies Linguistics grade 2.0 University of Münster Englisches Seminar course Systemic Functional Linguistics language English abstract Wherever we look we see language constituting the world not just reflecting it For instance the words for colours make a reality they don't just name things which are there the spectrum isn't divided into seven primary colours all the colours merge into one another According to structural linguistics by using language we are not reflecting a given reality but are rather construing one Systemic functional grammar developed by M A K Halliday states just this construal feature of language as well That language functions to make meanings and not to only refer to the outside world But furthermore elaborates on how a text makes those meanings It focuses therefore on the functional description of language The basic assumption is that language use is always functional people do not just talk or just write 2 but rather any use of language serves a specific purpose namely to make meanings The primary concern of systemic functional linguistics can therefore be summed up under the questions How is language structured for use 3 How does it make meanings According to Halliday language makes meanings on three different levels simultaneously on the experiential level because it represents experience

on the interpersonal level because language is used to interact with each other and on the textual level because we organize our message somehow This research paper will focus on the textual metafunction of language which is the theory of the clause being organized as a message The aim is to show that text itself construes the context by involving meaningful choices concerning what to put in thematic position and by means of cohesion Thus context is not only created through coherence i e the outside knowl

Culture & Text Cate Poynton, Alison Lee, 2000 In an exciting departure in the growing field of discourse analysis Culture Text combines a fresh approach to theory with exemplary demonstrations of interdisciplinary analysis Despite its emphasis on text cultural studies has kept most forms of discourse analysis at arm s length Positioned at the conjunction of linguistic and

poststructuralist approaches to discourse analysis this book argues for a textual metalanguage for cultural studies and for a reevaluation of methodology
