Thorndike, 1997 This classic introduction to educational and psychological measurement provides a technically rigorous treatment of the core issues in measurement in an easy to read and easy to comprehend way In preparing readers to become independent users of test information it describes problems in measurement explains how these problems are approached and solved surveys a broad range of sources and provides guidance in how to find evaluate and integrate information about specific tests This book focuses on the basic issues in measurement Offers an exceptionally readable presentation that does not require extensive math background Makes frequent cross references to related topics found in other chapters Increases emphasis on the assessments used by counselor school psychologist The 1984 Guide to the Evaluation of Educational Experiences in the Armed Services ,1984 *The 1980 Guide to the Evaluation of Educational Experiences in the Armed Services: Coast Guard, Marine Corps, Navy, Dept. of Defense* American Council on Education, 1980 **Case Studies in Control** Stanko Strmčnik, Đani Juričić, 2013-06-12 Case Studies in Control presents a framework to facilitate the use of advanced control concepts in real systems based on two decades of research and over 150 successful applications for industrial end users from various backgrounds In successive parts the text approaches the problem of putting the theory to work from both ends theoretical and practical The first part begins with a stress on solid control theory and the shaping of that theory to solve particular instances of practical problems It emphasizes the need to establish by experiment whether a model derived solution will perform properly in reality The second part focuses on real industrial applications based on the needs and requirements of end users Here the engineering approach is dominant but with theoretical input of varying degree depending on the particular process involved Following the illustrations of the progress that can be made from either extreme of the well known theory practice divide the text proceeds to a third part related to the development of tools that enable simpler use of advanced methods a need only partially met by available commercial products Each case study represents a self contained unit that shows an experimental application of a particular method a practical solution to an industrial problem or a toolkit that makes control design and implementation easier or more efficient Among the applications presented are wastewater treatment manufacturing of electrical motors temperature control of blow moulding burn protective garments quality assessment and rapid prototyping Written by contributors with a considerable record of industrially applied research Case Studies in Control will encourage interaction between industrial practitioners and academic researchers and be of benefit to both helping to make theory realistic and practical implementation more thorough and efficacious Advances in Industrial Control aims to report and encourage the transfer of technology in control engineering The rapid development of control technology has an impact on all areas of the control discipline The series offers an

opportunity for researchers to present an extended exposition of new work in all aspects of industrial control **Numerical Geometry, Grid Generation and Scientific Computing** Vladimir Garanzha, Lennard Kamenski, 2024-12-17 This volume presents a selection of papers presented at the 11th International Conference on Numerical Geometry Grid Generation and Scientific Computing held December 12-14, 2022 in memory of Sergei Alexandrovich Ivanenko.
