Fertilizer Manual was prepared by the International Fertilizer Development Center IFDC as a joint project with the United Nations Industrial Development Organization UNIDO. It is designed to replace the UN Fertilizer Manual published in 1967 and intended to be a reference source on fertilizer production technology and economics and fertilizer industry planning for developing countries. The aim of the new manual is to describe in clear simple language all major fertilizer processes, their requirements, advantages and disadvantages and to show illustrative examples of economic evaluations. The manual is organized in five parts. Part I deals with the history of fertilizers, world outlook, the role of fertilizers in agriculture and raw materials and includes a glossary of fertilizer related terms. Part II covers the production and transportation of ammonia and all important nitrogen fertilizers, liquids and solids. Part III deals with the characteristics of phosphate rock, production of sulfuric and phosphoric acid and all important phosphate fertilizers including nitrophosphates and ammonium phosphates. Part IV deals with potash fertilizers, ore mining and refining and chemical manufacture, compound fertilizers, secondary and micronutrients, controlled release fertilizers and physical properties of fertilizers. Part V includes chapters on planning a fertilizer industry, pollution control, the economics of production of major fertilizer products and intermediates and problems facing the world fertilizer industry.
