Department of Defense Sponsored Information Security Research Department of Defense,2008-02-13 After September 11th the Department of Defense DoD undertook a

massive and classified research project to develop new security methods using technology in order to protect secret information from terrorist attacks Written in language accessible to a general technical reader this book examines the best methods for testing the vulnerabilities of networks and software that have been proven and tested during the past five years An intriguing introductory section explains why traditional security techniques are no longer adequate and which new methods will meet particular corporate and industry network needs Discusses software that automatically applies security technologies when it recognizes suspicious activities as opposed to people having to trigger the deployment of those same security technologies Cyber Situational Awareness Sushil Jajodia,Peng Liu,Vipin Swarup,Cliff Wang,2009-10-03

Motivation for the Book This book seeks to establish the state of the art in the cyber situational awareness area and to set the course for future research A multidisciplinary group of leading researchers from cyber security cognitive science and decision science areas elaborate on the fundamental challenges facing the research community and identify promising solution paths Today when a security incident occurs the top three questions security administrators would ask are in essence What has happened Why did it happen What should I do Answers to the first two questions form the core of Cyber Situational Awareness Whether the last question can be satisfactorily answered is greatly dependent upon the cyber situational awareness capability of an enterprise A variety of computer and network security research topics especially some systems security topics belong to or touch the scope of Cyber Situational Awareness However the Cyber Situational Awareness capability of an enterprise is still very limited for several reasons Inaccurate and incomplete vulnerability analysis intrusion detection and forensics Lack of capability to monitor certain microscopic system attack behavior Limited capability to transform fused information into cyber intelligence Limited capability to handle uncertainty Existing system designs are not very friendly to Cyber Situational Awareness Capturing and Analyzing Internet Worms J.
