NERVOUS SYSTEM

The nervous system is the part of the body that controls and coordinates all the activities of the body.

Parts of the nervous system

The nervous system is divided into the central nervous system (CNS) and the peripheral nervous system (PNS).

The CNS consists of the brain and spinal cord.

The PNS consists of all the other nerves in the body.

The PNS is divided into the somatic nervous system and the autonomic nervous system.

The somatic nervous system controls voluntary movements.

The autonomic nervous system controls involuntary movements.

The autonomic nervous system is divided into the sympathetic and parasympathetic systems.

The sympathetic system is responsible for the 'fight or flight' response.

The parasympathetic system is responsible for the 'rest and digest' response.

ORGAN SYSTEMS OF THE BODY

The body is made up of many different organ systems that work together to keep the body functioning.

The organ systems are: Circulatory, Respiratory, Digestive, Excretory, Reproductive, and Integumentary.

The Circulatory system transports blood throughout the body.

The Respiratory system takes in oxygen and removes carbon dioxide.

The Digestive system breaks down food into nutrients that the body can use.

The Excretory system removes waste from the body.

The Reproductive system produces offspring.

The Integumentary system covers the body and protects it from the environment.
