Study of the structure and function of the human body

Anatomy

The scientific study of the structure of the human body

Physiology

The scientific study of the function of the human body

Structural levels

Also known as the levels of organization of the human body

- 1. Chemical level - study of the chemical composition of the body
- 2. Cellular level - study of the structure and function of cells
- 3. Tissue level - study of the structure and function of tissues
- 4. Organ level - study of the structure and function of organs
- 5. System level - study of the structure and function of body systems
- 6. Organism level - study of the structure and function of the whole body

CELLS AND TISSUES

Cells are the basic units of structure and function of the body

Composition of cellular fluids

Cells are composed of various fluids

Extracellular fluid - fluid outside the cell

Intracellular fluid - fluid inside the cell

Interstitial fluid - fluid between cells

Blood plasma - fluid part of blood

Organic fluids - fluids containing organic molecules

Inorganic fluids - fluids containing inorganic molecules

Electrolytes - substances that conduct electricity

Non-electrolytes - substances that do not conduct electricity

Acids - substances that release hydrogen ions

Bases - substances that accept hydrogen ions

pH - measure of acidity or alkalinity

Homeostasis - the body's ability to maintain a stable internal environment

Feedback loops - mechanisms that regulate the body's internal environment

Control systems - mechanisms that regulate the body's internal environment

Effectors - structures that respond to a stimulus

Receptors - structures that detect a stimulus

Integrating centers - structures that process information

Output - the response to a stimulus

Input - information that enters the system

Processing - the manipulation of information

Storage - the retention of information

Retrieval - the recovery of information

Deletion - the removal of information

Encryption - the conversion of information into a code

Decryption - the conversion of information back into its original form

Compression - the reduction in size of information
