Davies, 2007-05-07 From an author at the forefront of research in this area comes this provocative and seminal work that presents a unique and fresh new look at history and theory Taking a broadly European view the book draws on works of French and German philosophy some of which are unknown to the English speaking world and Martin L Davies spells out what it is like to live in a historicized world where any event is presented as historical as or even before it happens Challenging basic assumptions made by historians Davies focuses on historical ideas and thought about the past instead of examining history as a discipline The value of history in and for contemporary culture is explained not only in terms of cultural and institutional practices but in forms of writing and representation of historical issues too *Historics* stimulates thinking about the behaviours and practice that constitute history and introduces complex ideas in a clear and approachable style This important text is recommended not only for a wide student audience but for the more discerning general reader as well **The Nation and Its Fragments** Partha Chatterjee, 2020-05-05 In this book the prominent theorist Partha Chatterjee looks at the creative and powerful results of the nationalist imagination in Asia and Africa that are posited not on

identity but on difference with the nationalism propagated by the West. Arguing that scholars have been mistaken in equating political nationalism with nationalism as such, he shows how anticolonialist nationalists produced their own domain of sovereignty within colonial society well before beginning their political battle with the imperial power. These nationalists divided their culture into material and spiritual domains and staked an early claim to the spiritual sphere represented by religion, caste, women and the family, and peasants. Chatterjee shows how middle class elites first imagined the nation into being in this spiritual dimension and then readied it for political contest all the while normalizing the aspirations of the various marginal groups that typify the spiritual sphere. While Chatterjee's specific examples are drawn from Indian sources with a copious use of Bengali language materials, the book is a contribution to the general theoretical discussion on nationalism and the modern state. Examining the paradoxes involved with creating first a uniquely non-Western nation in the spiritual sphere and then a universalist nation state in the material sphere, the author finds that the search for a postcolonial modernity is necessarily linked with past struggles against modernity.

A Himalayan Master of Wisdom, 2020-06-12. Civilization is an inheritance, a patrimony that passes from race to race along the ascending and descending paths of cycles. In its dark ages, Europe rejected the testimony of Antiquity, calling such sages as Herodotus and other learned Greeks the Fathers of Lies. Lemuria and the Atlantic Continent, with their high civilizations, were submerged and drowned. The two catastrophes were separated by just years. Our present Fifth Race began in Asia a million years ago. Greek, Roman, and even Egyptian civilizations are nothing compared to the civilizations that began with the Third Race. Greeks and Romans were small sub-races and Egyptians part and parcel of our own Caucasian stock. Look at the latter and at India, having reached their highest civilization and learning, both went down. Today's India, one of the first and most powerful offshoots of the mother Race, is still struggling to resume her place in history. A series of far greater civilizations than our own existed before as well as after the Glacial Period; at various points of the globe reached the apex of glory and died. The Chaldees were at the apex of their Occult fame well before the so-called Bronze Age. The highest people now on earth in terms of spirituality belong to the first sub-race of the Fifth Root-race, the Aryan Asiatics. The highest in terms of physical intellectuality are those of the last sub-race of the Fifth, the White Conquerors. Black magic, bestiality, selfishness, and self-adoration spelled the demise of Atlantis and the rise of evil. The British Islands will be the first to be destroyed by submarine volcanoes and water. France and other lands will follow suit. When they reappear, very few seas and great waters will be found then on our globe. The approach of every new obscuration is always signalled by cataclysms, earthquakes, and fire. Though perfected in materiality, the Atlanteans degenerated in spirituality. Atlantis and its proud Fourth Race inhabitants sunk years ago, coinciding with the elevation of the Alps. When our present race reaches its zenith of intellectuality and its peak of materialistic civilization, unable to go any higher towards absolute evil, its progress will be arrested by one of such cataclysmic changes, and its sub-races will go down their respective cycles after a short period of glory and learning. See the

remnants of the Atlanteans the old Greeks and Romans how great how short and how evanescent were their days of fame and glory Every race had its adepts who are allowed to give out as much of their knowledge as the men of that race deserve The adepts of the last race will be far higher than any of the preceding races for among them will abide the future Planetary Spirit whose duty will be to instruct or refresh the memory of the first race of the Fifth Round men after this planet's future obscuration

Empire's Backyard Kailash Baral, 2025-10-03 This book transcends traditional historical analysis to explore the intricate tapestry of colonialism modernity and identity formation in Northeast India Moving beyond a simplistic view of the region as the British Empire's backyard it examines the transformative processes that turned Northeast India beyond Sylhet the empire's eastern outpost into a vibrant frontier While recognizing the importance of

exploration and territorial expansion in establishing colonial dominance the narrative emphasizes the crucial roles of resistance and local agency in shaping the region's history The volume critically analyzes the influence of the Church as a powerful force within the civilizing mission alongside military interventions It dissects the complex relationship between colonialism and modernity revealing how the rhetoric of progress often concealed motives of resource extraction and cultural disruption Through a meticulous unraveling of structures systems and processes the work weaves a compelling narrative of Northeast India not as a passive recipient of colonial ideas its imposition of alien rules and values but as a region actively shaped by the interplay of power resistance and adaptation This book will be of interest to scholars researchers and students of history sociology colonial and postcolonial studies cultural studies and South Asian studies especially those concerned with Northeast India Nation and the Writing of History in China and Britain, 1880-1930 Asier Hernández

Aguirresarobe,2022-08-19 Nation and the Writing of History in China and Britain explores through a comparative approach the reception of the nationalist worldview and its effects on the practice of history in China and Britain This book proposes that nationalism rather than a political doctrine is a way of making sense of the world which results from the combination of a set of definite assumptions The work analyzes how each one of these premises was accepted and negotiated by literati intellectuals historians and other scholars in the late nineteenth and early twentieth centuries The results of this research showcase how the reception of the new nationalist worldview crucially affected images of the past the present and the future in both societies and decisively framed cultural social and political debate In addition they likewise evidence the fundamental role that historical narratives play in the crystallization of national identities This book is perfect for readers interested in China and Britain during this time period but also to anyone attracted to new ways of conceiving nationalism and its role in our world The Uniqueness of Chinese Civilization in World History Guy S. Alitto,2023-04-29 The book is a meticulous

Slade,2021-09-17 While human existence in time is determined by the time of Jesus Christ by the logic of the incarnation passion resurrection and ascension the predominant accounts of time in the modern West have proceeded from a very different basis The implications of these approaches are not just a matter of epistemology or of abstract doctrinal and philosophical claims Instead they have had and continue to have concrete ramifications for human life together They have overwhelmingly been death dealing rather than life giving marked by a series of temporal moral errors that this book hopes to address As a counterexample this book reads Soren Kierkegaard alongside Karl Barth to highlight the ways that both figures rejected a Hegelian approach to time that was and is not coincidentally intertwined with a racialized account of history and the co opting of Christianity by the modern Western state
