Exploring the Ocean Worlds of Our Solar System Bernard Henin,2024-08-22 In the past 25 years planetary science has undergone a revolution with the discovery of vast oceans of liquid water within the icy moons of our Solar System These subsurface oceans are concealed beneath thick ice layers We refer to these moons and similar ocean bearing planetary objects as ocean worlds In this 2nd edition we delve into and compare the latest scientific discoveries on 22 confirmed or potential ocean worlds ranging from the giant asteroid Ceres and the icy moons Europa and Enceladus to the distant dwarf planets of the outer Solar System such as Pluto Sedna and Eris Along the way we explore the contributions of multiple spacecraft such as the Pioneers the Voyagers Galileo Cassini Huygens and many others which have provided much of our current knowledge about these worlds as well as the latest scientific research on this subject This book also explores the potential for life on each of the confirmed ocean worlds evaluating their habitability Ultimately these might hold the key to answering fundamental questions about life How did life begin Is there life beyond Earth Where do we come from With contributions from leading planetary scientists at NASA ESA and other institutions this book aims to be the definitive reference for anyone interested in this captivating subject *NASA Authorization for Fiscal Year 1972* United States.

Congress. Senate. Committee on Aeronautical and Space Sciences,1971 *I Know the Answers* Simon

Khachatryan,2023-08-23 Comparing human lifespans to the age of our planet we consider the Earth as some kind of constant But should we According to the Old Testament and many ancient manuscripts there were events and mythical characters that modern science can neither prove nor disprove In fact getting a scientific explanation of an event is much harder than witnessing it That is why science is way behind religion and our only hope for the future is to bridge the gap between them In this book the author explores why every generation struggles with reconciling the differences between science and religion He seeks to answer questions such as Has the Earth always rotated in the same direction Were there any shifts of the poles on Earth Was the sea level always the same Was the moon always there While there are widely accepted theories on the origin of continents oceans mountains lakes and volcanoes they all have their shortcomings In this book you ll discover a revolutionary approach that answers how our universe appeared and where we are going **Lunar and Planetary Science**
