Great White Shark

One of the most feared animals in the world is the shark. The shark that people are most afraid of is the great white shark. It gets its name from its white belly. The top of the great white shark is gray, which helps it blend in with the rocky bottom of the ocean.

Although some sharks are bigger, like the whale shark, the great white can grow up to 20 feet long. Unlike the calm, slow whale shark that feeds on tiny fish and plants, the great white is fast and aggressive. A great white's prey includes sea lions, seals, sea turtles, and rays. They use their razor sharp teeth, not to chew, but to rip their prey into small pieces. They have hundreds of teeth that can grow up to three inches long. The great white does not have many predators in the ocean except for orcas and larger sharks.

Humans however, are its biggest threat. Sharks often get caught in fishing nets or humans kill them for their fins or teeth.

1. How do great white sharks hide from predators?
2. Name one way a great white shark is different from a whale shark.
3. How are humans harmful to great white sharks?

The Short Story Anthology and Women's Writing Aleix Tura Vecino, 2025-08-14 Hundreds of anthologies of women's short stories have appeared in the literary market between the 1970s and now. This publishing and cultural phenomenon is considered for the first time in this book which argues that during this period anthologies have become a literary technology used not only to make visible female short story writers but also to think about and mould ideas of womanhood. Through creative and contextualised readings of the most important anthologies produced in this period, this study shows that this literary form has contributed to and in some cases pioneered key developments in gender theory and feminist thought including questions of political combination among women which underlie contemporary global movements such as MeToo. In doing so, the book also develops the first book-length conceptualisation of the features and meaning-making mechanisms of the short story anthology as a literary form. This book will benefit academics and students working in the fields of short fiction publishing and women's studies as well as feminist scholars and a growing number of specialists interested in the anthology as a literary form worldwide.

The Western Story Jon Tuska, 1999-11-01 The Western Story: A Chronological Treasury consists of twenty Western stories spanning the years 1892 to 1994. For that generation of American writers who saw the frontier in the last century including Mark Twain, Bret Harte and Owen Wister, it seemed exotic, strange, wonderful. Others such as Frederic Remington and John G. Neihardt reflected the clash between various Indian nations and pioneers. These authors prepared the way for the founders of the first Golden Age of the Western story: Willa Cather who wrote of pioneer life in Nebraska; Zane Grey who combined wilderness experiences with romance and the search for spiritual truth; B. M. Bower who portrayed the cowboys and frontier women she knew growing up in Montana; Max Brand who created dramas in which the psychological and spiritual meaning of life was more important than the physical terrain; and Ernest Haycox who combined character and drama with historical accuracy. Another generation of writers perpetuated this first Golden Age: Peter Dawson and T. T. Flynn who began writing Western stories in the 1930s; Walter Van Tilburg Clark who created a masterpiece in *The Ox-Bow Incident*; Dorothy M. Johnson and Les Savage Jr who experimented with making the Western story still more realistic; and Louis L. Amour whose visibility and popularity won legions of new readers to the genre. Humanity, depth and verisimilitude were already part of the Western story when Will Henry, Elmer Kelton and T. V. Olsen came on the scene to intensify these qualities in their own stories, even as they experimented with new perspectives. And Cynthia Haseloff's story, written especially for this collection with its symbolism and its simplicity, may be the harbinger of a second Golden Age.
