 Competitions** Jane Chen, Yongcheng Chen, Sam Chen, Guiling Chen, 2012-07-02 While the books in this series are primarily
 designed for AMC competitors they contain the most essential and indispensable concepts used throughout middle and high
 school mathematics Some featured topics include key concepts such as equations polynomials exponential and logarithmic
 functions in Algebra various synthetic and analytic methods used in Geometry and important facts in Number Theory The
 topics are grouped in lessons focusing on fundamental concepts Each lesson starts with a few solved examples followed by a
 problem set meant to illustrate the content presented At the end the solutions to the problems are discussed with many
 containing multiple methods of approach I recommend these books to not only contest participants but also to young aspiring
 mathletes in middle school who wish to consolidate their mathematical knowledge I have personally used a few of the books
 in this collection to prepare some of my students for the AMC contests or to form a foundation for others By Dr Titu
