4. Darwin's curiosity might have led him to make many observations and ask questions about the natural world. His analytical nature may have helped Darwin to record and organize his observations, allowing him to recognize patterns and trends.
5. The vice-governor of the Galápagos Islands told Darwin that the shell shape of a tortoise could be used to identify the island it inhabited.
6. Because the Isabela Island tortoise has such a short neck, it would require a habitat where food is easy to reach.
7. Because of its long neck, the Hood Island tortoise would most easily obtain food that is hard to reach.
8. Because birds use their beaks to eat or capture food, differently shaped beaks would mean that the birds lived on different diets.

8. Darwin asked, if Earth could change over long periods of time, then could life change as well? He also realized that if life could change as he was suggesting, then it would take many, many years to occur.
9. Lamarck's idea that species are adapted to their environment is true. Lamarck's idea that acquired characteristics are inheritable is false.
10. Darwin realized that plants and animals often produce thousands or millions of seeds or eggs, yet most potential offspring die. He asked what factors determine which offspring die and which survive and reproduce.

Section Review 15-3

1. Darwin stated that nature provides the variation among organisms, and humans select and breed for the variations they find useful or appealing.
