Document Analysis Systems VI Simone Marinai, Andreas Dengel, 2004-08-26

This volume contains papers selected for presentation at the 6th IAPR Workshop on Document Analysis Systems DAS 2004 held during September 8-10 2004 at the University of Florence Italy. Several papers represent the state of the art in a broad range of traditional topics such as layout analysis, applications to graphics recognition and handwritten documents. Other contributions address the description of complete working systems, which is one of the strengths of this workshop. Some papers extend the application domains to other media like the processing of Internet documents. The peculiarity of this 6th workshop was the large number of papers related to digital libraries and to the processing of historical documents, a task which frequently requires the analysis of color documents. A total of 17 papers are associated with these topics, whereas two years ago in DAS 2002 only a couple of papers dealt with these problems. In our view, there are three main reasons for this new wave in the DAS community. From the scientific point of view, several research fields reached a thorough knowledge of techniques and problems that can be effectively solved, and this expertise can now be applied to new domains. Another incentive has been provided by several research projects funded by the EC and the NSF on topics related to digital libraries.

Topics covered include a variety of systems and architectures for processing document images as well as methods for converting those images into formats that can be manipulated by a computer. The chapters are written by recognized experts in the field and describe Systems and Architectures, Recognition Techniques, Graphics Analysis, Document Image Retrieval, and World Wide Web Applications.

Document Analysis Systems V Daniel Lopresti, Jianying Hu, Ramanujan Kashi, 2003-08-02. This book constitutes the refereed proceedings of the 5th International Workshop on Document Analysis Systems DAS 2002 held in Princeton, NJ, USA, in August 2002, with sponsorship from IAPR. The 44 revised full papers presented together with 14 short papers were carefully reviewed and selected for inclusion in the book. All current issues in document analysis systems are addressed. The papers are organized in topical sections on OCR features and systems, handwriting recognition, layout analysis, classifiers and learning, tables and forms, text extraction, indexing and retrieval, document engineering, and new applications.

Document Analysis Systems VII Horst Bunke, A. Lawrence Spitz, 2006-01-20. This book constitutes the refereed proceedings of the 7th International Conference on Document Analysis Systems DAS 2006 held in Nelson, New Zealand, in February 2006.
