Iaizzo, 2010-03-11 A revolution began in my professional career and education in 1997 In that year I visited the University of Minnesota to discuss collaborative opportunities in cardiac anatomy physiology and medical device testing The meeting was with a faculty member of the Department of Anesthesiology Professor Paul Iaizzo I didn't know what to expect but as always I remained open minded and optimistic Little did I know that my life would never be the same During the mid to late 1990s Paul Iaizzo and his team were performing anesthesia research on isolated guinea pig hearts We found the work appealing but it was unclear how this research might apply to our interest in tools to aid in the design of implantable devices for the cardiovascular system As discussions progressed we noted that we would be far more interested in reanimation of large mammalian hearts in particular human hearts Paul was confident this could be accomplished on large hearts but thought that it would be unlikely that we would ever have access to human hearts for this application We shook hands and the collaboration was born in 1997 In the same year Paul and the research team at the University of Minnesota including Bill Gallagher and Charles Soule reanimated several swine hearts Unlike the previous work on guinea pig hearts which were reanimated in Langendorff mode the intention of this research was to produce a fully functional working heart model for device testing and cardiac research The Biological Basis of Mental Health Nursing William T. Blows, 2010-12-14 Written by an experienced nurse lecturer who also trained as a mental health nurse this book explores the underlying biology associated with the pathology of mental health disorders and the related nervous system

Fully revised for this second edition the text includes three new chapters on brain development pharmacology and learning behavioural and developmental disorders Integrating up to date pharmacological and genetic knowledge with an understanding of environmental factors that impact on human biology The Biological Basis of Mental Health Nursing covers topics including the physiology of neurotransmission and receptors hormones and mental health the biology of emotions stress anxiety and phobic states the biology of substance abuse the pharmacology of psychoactive drugs developmental disorders brain anatomy and development the biology of behaviour genetics and mental health affective disorders depression mania and suicide schizophrenia autism and other syndromes the ageing brain and dementia degenerative diseases of the brain epilepsy Accessibly laid out with many of diagrams tables and key points at the end of each chapter this is an essential text for mental health nursing students practitioners and educators *Environmental Health Perspectives* ,2004
