Engineering Materials and Metallurgy Mr. R. Prem Kumar, Dr. G. Suganya B.E , M.E., Ph.D, Mr. Ganeshkumar. KV, Mr. P. Karthick, 2025-09-05 Engineering Materials and Metallurgy is a comprehensive textbook that explores the fundamental principles, processes and applications of materials science and metallurgy in engineering. Carefully structured for students, educators and professionals, this book bridges the gap between theoretical concepts and practical applications, making it a valuable resource for academic study as well as industrial practice. The text begins with the constitution of alloys and phase diagrams, building a foundation for understanding material structures and transformations. It then moves into heat treatment processes for ferrous and non ferrous alloys and non metallic materials such as polymers, ceramics and composites. The final section delves deeply into mechanical properties, material testing and failure mechanisms like fatigue, creep and fracture, essential for design and analysis in real world engineering systems. Each chapter is supported with illustrations, classification charts, process diagrams and case based examples, ensuring clarity and retention of key concepts. The book emphasizes both the scientific principles and their engineering implications, highlighting applications in industries such as aerospace, automotive, construction and manufacturing. Designed primarily for undergraduate students in Mechanical, Metallurgical, Production and Materials Engineering, this book also serves as a ready reference for researchers, practicing engineers and industry professionals. By combining depth of coverage with accessibility, it equips readers with the knowledge to select, process and apply engineering materials effectively in modern technological contexts. *Computational Vision and Bio-Inspired Computing* S. Smys, João Manuel R. S. Tavares, Robert Bestak, Fuqian Shi, 2021-06-14 This book includes selected papers from the 4th International Conference on Computational Vision and Bio Inspired Computing ICCVBIC 2020 held in Coimbatore, India, from November 19 to 20, 2020. This proceedings book presents state of the art research innovations in computational vision and bio inspired techniques. The book reveals the theoretical and practical aspects of bio inspired computing techniques like machine learning, sensor based models, evolutionary optimization and big data modeling and management that make use of effectual computing processes in the bio inspired systems. As such, it contributes to the novel research that focuses on developing bio inspired computing solutions for various domains such as human computer interaction, image processing, sensor based single processing recommender systems and facial recognition, which play an indispensable part in smart agriculture, smart city, biomedical and business intelligence applications.
