

Research Paper Abstract Example

Factory farming is inhumane.

Pigs are among the species that are victim to this cruel industry.

Consumers are unaware of this immense suffering.

Pigs suffer more than other farm animals.

The reason pigs experience more suffering than other farm animals is due to their high intelligence levels (pigs have an intelligence level similar to that of a four-year-old child).

A case study of a factory farm in Ohio allowed a quantitative analysis of physical signs of distress shown in pigs compared to chickens and cows.

The findings indicate that pigs display a higher frequency and severity of distress compared to chickens and cows. Pigs displayed 55% more signs of distress and were the only farm animal cannibalising.

The public needs to know about the suffering pigs are experiencing and the factory farming industry needs to improve conditions for factory farmed pigs.
