The 'other's' Gaze Davide Mazzi, 2012 The book combines the tools of corpus linguistics and discourse analysis in the attempt to investigate the discursive construction of professional identity on the part of journalists from Italy and the United States of America More specifically the ultimate objective of the study is to examine the discursive resources enabling journalists to construct their professional persona as experts exerting their authority in a community of practice while they gaze at the other The analysis thus focuses on news articles from quality papers from Italy and the United States where each other's country is represented With this primary aim in mind the volume addresses the following leading questions How is the other Italy in the US and the US in Italy represented How do journalists use language in order to craft their professional identity as they observe the other How is this operation subtly encoded in the language of texts traditionally credited with a balanced recount of facts i.e. news articles

Revisiting Insider-Outsider Research in Comparative and International Education Michael Crossley, Lore Arthur, Elizabeth McNess, 2015-11-01 This volume recognises how many researchers across the social sciences and in comparative and international education in particular see themselves as insiders or outsiders or more pertinently shifting combinations of both in the research process The book revisits and problematises these concepts in an era where the global mobility of researchers and ideas has increased dramatically and when advances in comparative qualitative research methodologies seek to be more inclusive collaborative participatory reflexive and nuanced Collectively the chapters argue that in the context of such change it has become more difficult to categorise and label groups and individuals as being inside or outside systems professional communities or research environments In doing so it is recognised that individual and group identities can be multiple flexible and changing such that the boundary between the inside and the outside is permeable less stable and less easy to draw The book draws upon an exciting collection of original research carried out in a diversity of educational systems from British European Latin American Indian Ocean South Asian African and Chinese contexts and cultures This develops a deep and innovative reconsideration of key issues that must be faced by all researchers involved in the planning and conduct of in depth field research This is a challenging and stimulating methodological contribution designed to advance critical and reflective thinking while providing practical and accessible guidance insights and support for new and experienced researchers within and beyond the field of comparative and international education
