Academic Journals On Gun Control:

Handgun Crime Control, 1975-1976: Oversight of 1968 Gun Control Act United States. Congress. Senate. Committee on the Judiciary. Subcommittee to Investigate Juvenile Delinquency, 1976

The Science of Gun Policy RAND Corporation, 2018-03-02 This report synthesizes the available scientific evidence on the effects of various firearm policies on firearm deaths violent crime the gun industry participation in hunting and sport shooting and other outcomes Based on this synthesis the authors highlight policies whose effects are better supported by evidence and areas where more and better information could contribute to establishing fair and effective gun policies

In Defense of Gun Control Hugh LaFollette, 2018 The gun control debate is more complex than we often acknowledge What is often phrased as a single question should we have gun control Is actually made up of three distinct policy questions First who should we permit people to have guns Second which guns should be allowed Thirdly how should we regulate the acquisition storage and carrying of the guns people may legitimately own To answer these questions we must decide whether and which people have a right to bear arms what kind of right they have and how stringent that right is We must also evaluate divergent empirical claims about a the role of guns in causing harm and b the degree to which private ownership of guns can protect innocent civilians from attacks by criminals either in their homes or in public Hugh LaFollette sorts through the conceptual moral and empirical claims to fairly assess arguments for and against serious gun control and ultimately argues that the US needs far more gun control than we currently have in most jurisdictions

Evaluating Research in Academic Journals Maria Tcherni-Buzzeo, Fred Pyszczak, 2024-03-01 Evaluating Research in Academic Journals is a guide for students learning how to evaluate reports of empirical research published in academic journals It breaks down the process of evaluating a journal article into easy to understand steps and emphasizes the practical aspects of evaluating research The book describes the nuances that may make an article publishable even when it has serious methodological flaws Students learn when and why certain types of flaws may be tolerated and why evaluation should not be performed mechanically Each chapter is organized around evaluation questions and the book includes numerous examples from journals in the social and behavioral sciences to illustrate the application of evaluation questions and provide actual instances of strong and weak features of published reports Common sense models for evaluation combined with a lack of jargon make it possible for students to start evaluating research articles in the first week of class making this the ideal textbook for instructors and students across a range of disciplines New to this edition A new chapter on Types of Research Coverage of the new realities of online survey methods and research using big data A new appendix on Emerging Issues in Survey Research More emphasis and information on qualitative case studies and action research Expanded discussion of research ethics including additional research ethics oriented guidelines and new appendices devoted to noteworthy cases of research ethics breaches The accompanying Instructor and Student Resources provide free digital materials designed to test student knowledge and save time when

preparing lessons including over 150 multiple choice questions articles videos and weblinks for students to test their knowledge of the material and further their understanding of concepts and downloadable lecture slides and test banks for instructors

Handgun Crime Control, 1975-1976 United States. Congress. Senate. Committee on the Judiciary. Subcommittee to Investigate Juvenile Delinquency, 1976

Gun Control in Context Suzanna Fay, 2024-05-09 This book approaches the gun control debate by asking what it takes to achieve acceptance of and compliance with gun control regulations in a community thought to be opposed and resistant It does this by centring this question on the experience of gun dealers who occupy a dual role in the compliance process subject to its regulations yet central to the application of all regulatory processes The findings are surprising in that they demonstrate more support for gun control than opposition among this group more willingness to cooperate with authorities than resistance and more possibility for setting the tone for support with the wider gun owning community This book considers how policy makers in the USA can capitalise on these overtones of collaboration and concern for public safety and learn from the successes and mistakes of the Australian gun control experience *Gun Control in Context* is essential reading for all those engaged across the broad spectrum of the gun control debate and offers a grounded and reasoned approach to the challenges of public policy It will be of interest to criminologists legal scholars and political scientists alike

Rampage

Shootings and Gun Control Steffen Hurka, 2017-05-18 While the causes of rampage violence have been analysed thoroughly in diverse academic disciplines we hardly know anything about the factors that affect their consequences for public policy This book addresses rampage shootings in Western Europe and their conditional impact on politicization and policy change in the area of gun control The author sets out to unravel the factors that facilitate or impede the access of gun control to the political agenda in the wake of rampage shootings and analyses why some political debates lead to profound shifts of the policy status quo while others peter out without any legislative reactions In so doing the book not only contributes to the theoretical literature on crisis induced policy making but also provides a wealth of case study evidence on rampage shootings as empirical phenomena In particular the extent to which gun control gets politicized as a policy failure can either result from a bottom up process event severity and media pressure or from a top down logic issue ownership and the electoral cycle Including 12 case studies on the rampage shootings which have triggered a debate over the appropriateness of the affected countries gun policies it illustrates that the way political processes unfold after rampage shootings depends strongly on specific causal configurations and draws comparisons between the cases covered in the book and the way rampage shootings are typically dealt with in the United States This text will be of key interest to scholars and students of public policy policy analysis European Politics and more broadly to comparative politics criminology psychology and sociology The Open Access version of this book available at <https://doi.org/10.4324/9781315209425> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
