Renewal of the Federal Grant for the Trans-Alaska Pipeline System Right-of-way, 2002 **Draft Environmental Impact Statement** United States. Bureau of Land Management. Alaska State Office, 2002 [Kobuk-Seward Peninsula Resource Management Plan and Environmental Impact Statement](#), 2006 *Kobuk-Seward Peninsula Resource Management Plan*, 2006 **Bay Resource Management Plan**, 2007 **General Technical Report PNW-GTR**, 2007 **Bering Glacier** Robert Allan Shuchman, Edward George Josberger, 2010 Bering Glacier is the largest surging glacier in the world having surged at least six times in the last 150 years With the glacier advancing and retreating as much as 10 km over a surge cycle it is one of the most physically and biologically dynamic places on Earth This monograph presents the results of a comprehensive and diverse series of field studies and science investigations at Bering Glacier The results reported are from a wide range of disciplines including glaciology geology paleogeology hydrology limnology oceanography tectonics geomorphology geophysics meteorology remote sensing climate change anthropology and ecological studies pertaining to vegetation fish and marine mammals The compilation of these individual studies into a single publication allows for a more complete understanding of how the approximately 5 000 km² Bering Glacier system plays a major role in the greater southeastern coastal region of Alaska and through its wastage its impact on the circulation of the northeast Pacific Ocean and on the global sea level **The Bering Sea and Aleutian Islands** Terry Lee Johnson, 2003 This richly illustrated book unveils the mystery and wonder of the vast Bering Sea region from the shores of Alaska along the volcanic stretch of the Aleutian Islands to the Russian coast Author Terry Johnson tells how the biological and physical worlds above and below the sea meld to form a complex and rich natural environment The book also covers history from early Russian exploration and exploitation through the U S purchase of Alaska the international struggles of World War II and the Cold War to present day efforts to manage the abundant natural resources To see photos from this book visit www.uaf.edu/seagrant/bookstore/beringsea *Riparian and Aquatic Habitats of the Pacific Northwest and Southeast Alaska* Fred H. Everest, 2007 Management of riparian habitats is controversial because land use policies have historically emphasized economic values e g timber production at the expense of ecological and social values Attempting to manage these valuable resources to attain the greatest combination of benefits has created a long term controversy that continues to the present Our analysis indicates that at mid to large spatial scales healthy riparian ecosystems and land management activities are not mutually exclusive but the degree of compatibility is determined by policy decisions based on competing demands and pressing timelines as well as available scientific knowledge Current management schemes on federal lands in the Pacific Northwest and Alaska are appropriately addressing large spatial scales and incorporating the principles of disturbance ecology We found no scientific evidence that either the default prescriptions or the options for watershed analysis in the Northwest Forest Plan and Tongass Land Management Plan provide more protection than necessary to meet stated riparian management goals We believe that

additional alternative riparian management strategies could be implemented and evaluated in concert to shorten the time needed to realize effective strategies that fully meet riparian management goals **Sea Lions of the World** Andrew W. Trites, 2006
