

ALCATEL-LUCENT LIGHTRADIO 9361 HOME CELL ASKEY V3 B1 20mW

The Alcatel-Lucent lightRadio™ 9361 Home Cell Askey V3 B1 20mW (lightRadio 9361 HC) is a low-power, high-capacity wireless device that cost-effectively extends Wideband Code Division Multiple Access (W-CDMA) and High-Speed Packet Access+ (HSPA+) coverage and capacity to the home, delivering fast, responsive data service and crystal-clear voice.

Front view

Back view

The end user simply connects the lightRadio 9361 HC to power and a broadband Internet service, and the lightRadio 9361 HC automatically comes into service without any additional user intervention.

The lightRadio 9361 HC increases the uptake of 3G services, generating additional revenue from services mobile service providers (MSPs) already offer. It also provides application programming interfaces (APIs) that enable MSPs to leverage unique network capabilities, such as location and presence, to develop new, innovative applications.

The lightRadio 9361 HC uses a flat IP architecture and secured access through an existing broadband Internet connection to offload voice and data traffic from a macro network, substantially reducing capital expenditures (CAPEX) and operating expenditures (OPEX). True plug-and-play capabilities and Bell Labs Self-optimizing Network (SON) technology enable zero-touch configuration and self-optimization to deliver outstanding performance.

This product improves end-user quality of experience (QoE) through a higher quality air interface that provides crystal-clear voice, faster and more reliable data connections and higher data throughput.

The lightRadio 9361 HC is part of the carrier-grade, end-to-end Alcatel-Lucent 9360 Small Cells solution that easily integrates into any MSP's existing 3G network.

FEATURES

- SON self-configuring and self-optimizing capabilities:
 - ~ Adaptive transmit power for coverage optimization
 - ~ 2G/3G neighbour lists for cell reselection and handovers
 - ~ Selection of optimal primary scrambling code
- Seamless mobility and simultaneous voice and data service continuity with the macro network
- Support for shared secret and certificate-based authentication (from BCR4.3)
- Application enablement through presence API, network local routing and Internet traffic breakout
- Customizable to an MSP's specifications: Casing and strip color, logo, packaging sleeve and user guide

BENEFITS

- Extends W-CDMA coverage and HSPA+ capacity to residences with a low total cost of ownership
- Improves end-user QoE
- Enables end-user self-installation through plug-and-play design
- Eliminates special backhaul requirements by using an existing broadband Internet connection
- Provides secure access to the MSP's network
- Enables development of value-added, innovative services based on location, presence, quality of service and trusted security
