Equine Applied and Clinical Nutrition Raymond J. Geor, Patricia Harris, Manfred Coenen, 2013-01-31 *Equine Applied and Clinical Nutrition* is a comprehensive text resource on the nutrition and feeding management of horses. Over 20 experts from around the world share their wisdom on a topic of central relevance to all equine practitioners and the equine community generally. Both basic and applied, including healthy and diseased animals, nutrition and feeding management of horses and other equids (i.e. ponies, donkeys, wild equids) are covered. The book will appeal to a wide audience: undergraduate and postgraduate students in equine science and veterinary medicine, veterinarians, equine nutritionists, horse trainers, and owners. The clinical component will strengthen the appeal for equine veterinarians. *Equine Applied and Clinical Nutrition* will be a must-have for anyone involved in the care of horses, ponies, and other equids. The book is divided into 3 parts. Basic or core nutrition in this context refers to

digestive physiology of the horse and the principles of nutrition Applied nutrition deals with the particular types of foods and how to maintain an optimum diet through various life stages of the horse You might characterize this aspect as prevention of disease through diet Clinical nutrition covers various diseases induced by poor diet and their dietary treatment and management It also looks at specific feeding regimes useful in cases disease not specifically induced by diet Authoritative international contributions Strong coverage of clinical aspects either omitted from or only sparsely dealt with elsewhere Full colour throughout The only clinical equine nutrition book

Heifer International Exchange ,1981 **Practical Animal Nutrition** Vishal Mudgal,2012 Complete information in a comprehensible way is the watchword of the book The book consists of three parts

and each part provides a structured approach to learning by covering all the topics in a uniform and systematic format. The topics under each part have been carefully designed to conform to the VCI syllabus. Part I deals with principles of animal nutrition and feed technology which comprehensively covered about the proximate principles and estimation of common macro elements like calcium and phosphorus. It also includes about the cell wall fractionation and estimation of common toxic principles present in feeds. Part II deals with applied animal nutrition I where the feeding on ruminant animals specifically the cattle, buffalo, sheep and goats in their different physiological stages are discussed and requirements of different nutrients as well as formulation of their respective ration has been taken care of. Part III deals with applied animal nutrition II where the feeding on non ruminant animals specifically the swine and poultry in their different physiological stages are discussed and requirements of different nutrients as well as formulation of their respective diet has been taken care of. In addition to that principles of mixing and compounding of feed has also been considered. The book is similarly useful for the post graduate students of animal sciences, teachers and scientists of animal nutrition discipline, personnel of feed industry involved in feed manufacturing and marketing, field veterinarian, animal husbandry extension worker and progressive animal farmers and animal lovers.
