Signal Processing of Power Quality Disturbances Math H. J. Bollen, Irene Y. H. Gu, 2006-12-13 Bridging the gap between power quality and signal processing This innovative new text brings together two leading experts one from signal processing and the other from power quality Combining their fields of expertise they set forth and investigate various types of power quality disturbances how measurements of these disturbances are processed and interpreted and finally the use and interpretation of power quality standards documents As a practical aid to readers the authors make a clear distinction between two types of power quality disturbances Variations disturbances that are continuously present Events disturbances that occur occasionally A complete analysis and full set of tools are provided for each type of disturbance Detailed examination of the origin of the disturbance Signal processing measurement techniques including advanced techniques and those techniques set forth in standards documents Interpretation and analysis of measurement data Methods for further processing the features extracted from the signal processing into site and system indices The depth of coverage is outstanding the authors present and analyze material that is not covered in the standards nor found in the scientific literature This text is intended for two groups of readers students and researchers in power engineering who need to use signal processing techniques for power system applications and students and researchers in signal processing who need to perform power system disturbance analyses and diagnostics It is also highly recommended for any engineer or utility professional involved in power quality monitoring

Modelling and Controlling Hydropower Plants German Ardul Munoz-Hernandez, Sa'ad Petrous Mansoor, Dewi Ieuan Jones, 2012-06-13 Hydroelectric power stations are a major source of electricity around the world understanding their dynamics is crucial to achieving good performance The electrical power generated is normally controlled by individual feedback loops on each unit The reference input to the power loop is the grid frequency deviation from its set point thus structuring an external frequency control loop The book discusses practical and well documented cases of modelling and controlling hydropower stations focused on a pumped storage scheme based in Dinorwig North Wales These accounts are valuable to specialist control engineers who are working in this industry In addition the theoretical treatment of modern and classic controllers will be useful for graduate and final year undergraduate engineering students This book reviews SISO and MIMO models which cover the linear and nonlinear characteristics of pumped storage hydroelectric power stations The most important dynamic features are discussed The verification of these models by hardware in the loop simulation is described To show how the performance of a pumped storage hydroelectric power station can be improved classical and modern controllers are applied to simulated models of Dinorwig power plant that include PID Fuzzy approximation Feed Forward and Model Based Predictive Control with linear and hybrid prediction models
