Lebuhn, Kim Trogal, Tihomir Viderman, Tigran Haas, 2021-10-24 *Care and the City* is a cross disciplinary collection of chapters examining urban social spaces in which caring and uncaring practices intersect and shape people's everyday lives. While asking how care and uncare are embedded in the urban condition, the book focuses on inequalities in caring relations and the ways they are acknowledged, reproduced, and overcome in various spaces, discourses, and practices. This book provides a pathway for urban scholars to start engaging with approaches to conceptualize care in the city through a critical reflexive analysis of processes of urbanization. It pursues a systematic integration of empirical, methodological, theoretical, and ethical approaches to care in urban studies while overcoming a crisis-centered reading of care and the related ambivalences in care debates, practices, and spaces. These strands are elaborated via a conceptual framework of care and situated within broader theoretical debates on cities, urbanization, and urban development with detailed case studies from Europe, the Americas, and Asia. By establishing links to various fields of knowledge, this book seeks to systematically introduce debates on care to the interconnecting fields of urban studies, planning theory, and related disciplines for the first time.

Journeys through Emerging Adulthood Alan Reifman, 2022-07-29 *Journeys through Emerging Adulthood* takes the reader on a tour of contemporary transitions to adulthood, reporting on the latest cross-national and cross-cultural research into young adulthood and separating fact from fiction about this important life phase. Alan Reifman shows how today's youth are taking more time to enter traditional adult roles and explores the benefits and disadvantages of this gradual emergence into adulthood. This essential textbook navigates the research that reveals the substantial variety in young people's paths to adulthood. It covers the spectrum of the young adult experience, examining the influence that parents have on their grown children's progress and identity as adults and considering the impact of traditional milestones such as higher education, establishing a career, forming romantic relationships, and becoming a parent. It examines key topics including mental health in emerging adults and the likelihood of substance abuse and how young adults might reach out into the community through volunteerism, religious involvement, and political activism. Each section includes examples and studies conducted in a range of countries, exploring how the journey to adulthood can vary according to cultural context as well as individual circumstance. The book affirms that while there is great variety in how one transitions to adulthood, there is no correct path, and most people fare well or even thrive in adulthood. Featuring end-of-chapter summaries, quizzes, and activities, *Journeys Through Emerging Adulthood* provides an accessible yet comprehensive overview of this significant life stage, connecting fundamental psychological theories with modern social phenomena. Reifman's text is essential reading for both undergraduate and graduate students of psychology, human development, and sociology, as well as students and researchers of any discipline interested in the path to adulthood.
