Student Activity Workbook for Breakthrough! the Bible for Young Catholics, 2006 The student workbook covers the same people as the teaching activities manual Each biblical figure has a puzzle for the young person to work with that guarantees that they have the basics of the story down encouraging them to read about each person A second page has a short introduction to the character that explains their place in salvation history This page also contains reflection questions for the young people to consider as they make connections between this biblical figure and their own lives

Emerson's Lessons on the Old Testament Joseph Emerson, 1857 *Game Theory and the Humanities* Steven J. Brams, 2012-08-24 How game theory can offer insights into literary historical and philosophical texts ranging from Macbeth to Supreme Court decisions Game theory models are ubiquitous in economics common in political science and increasingly used in psychology and sociology in evolutionary biology they offer compelling explanations for competition in nature But game theory has been only sporadically applied to the humanities indeed we almost never associate mathematical calculations of strategic choice with the worlds of literature history and philosophy And yet as Steven Brams shows game theory can illuminate the rational choices made by characters in texts ranging from the Bible to Joseph Heller's *Catch 22* and can explicate strategic questions in law history and philosophy Much of Brams's analysis is based on the theory of moves TOM which is grounded in game theory and which he develops gradually and applies systematically throughout TOM illuminates the dynamics of player choices including their misperceptions deceptions and uses of different kinds of power Brams examines such topics as the outcome and payoff matrix of Pascal's wager on the existence of God the strategic games played by presidents and Supreme Court justices and how information was slowly uncovered in the game played by Hamlet and Claudius The reader gains not just new insights into the actions of certain literary and historical characters but also a larger strategic perspective on the choices that make us human
