lobbying power of corporations the political maneuverings of countries and the tolerance of everyday consumers buying a cup of coffee a tank of gas or an airplane ticket Along the way Schapiro tracks the cost of carbon through the drought ridden farmland of California the jungles of Brazil the world s greatest manufacturing center in China the carbon trading center of Europe and the high tech crime world that carbon markets have inspired He even tracks the cost of carbon through the skies themselves where efforts to put a price tag on the carbon left by airplanes in the no man s land of the atmosphere created what amounted to a quiet but powerful global trade war The End of Stationarity deftly depicts the wild new carbon economy and shows us how nations emerging and developed teeter on its brink Originally published in hardcover as Carbon Shock the book is updated throughout and includes a new afterword based on the Paris climate talks     **Artificial Intelligence in**
