Alcoa Aptitude Test:

From Monopoly to Competition George David Smith, 2003-12-18 When Charles Martin Hall patented the process for refining the metal in 1886 it was far from self evident that the new technology would be a business success Problems involving the technology had to be solved Capital and a labour force were needed The most pressing entrepreneurial dilemma was the need to develop markets for what was then a novelty product George David Smith examines how Alcoa met these problems with special attention to innovation from Alcoa s beginnings through its development into one of the most successful monopolies in American history By World War II no other American corporation had developed its industry s markets more dramatically and then dominated them more completely The book then analyzes the undoing of Alcoa s monopoly by war and antitrust and examines how the firm adapted to evolving forms of oligopolistic and global competition
