The Brilliance of Black Children in Mathematics Jacqueline Leonard, Danny B. Martin, 2013-03-01 This book is a critically important contribution to the work underway to transform schooling for students who have historically been denied access to a quality education specifically African American children The first section of the book provides some historical perspective critical to understanding the current state of education in the U S specifically for the education of African American children The following sections include chapters on policy learning ethnomathematics student identity and teacher preparation as it relates to the mathematical education of Black children Through offering counternarratives about mathematically successful Black youth advocating for a curriculum that is grounded in African American culture and ways of thinking providing shining examples of the brilliance of Blacks students and promoting high expectations for all rather than situating students as the problem the authors of this book provide powerful insights related to the teaching and learning of mathematics for African American students As is made evident in this book effective teaching involves much more than just engaging students in inquiry based pedagogy Kitchen 2003 The chapters offered in this book demonstrate how mathematics instruction for African American students needs to take into account historical marginalization and present day policies that do harm to Black students Kunjufu 2005 Empowering mathematics instruction for African American students needs to take into consideration and promote students cultural spiritual and historical identities Furthermore mathematics instruction for African American students should create opportunities for students to express themselves and the needs of their communities as a means to promote social justice both within their classrooms and communities

Stereotype Threat Michael Inzlicht, Toni Schmader, 2012 The 21st century has brought with it unparalleled levels of diversity in the classroom and the workforce It is now common to see in elementary school high school and university classrooms not to mention boardrooms and factory floors a mixture of ethnicities races genders and religious affiliations But these changes in academic and economic opportunities

have not directly translated into an elimination of group disparities in academic performance career opportunities and levels of advancement Standard explanations for these disparities which are vehemently debated in the scientific community and popular press range from the view that women and minorities are genetically endowed with inferior abilities to the view that members of these demographic groups are products of environments that frustrate the development of the skills needed for success Although these explanations differ along a continuum of nature vs nurture they share in common a presumption that a large chunk of our population lacks the potential to achieve academic and career success In contrast to intractable factors like biology or upbringing the research summarized in this book suggests that factors in one's immediate situation play a critical yet underappreciated role in temporarily suppressing the intellectual performance of women and minorities creating an illusion of group differences in ability Research conducted over the course of the last fifteen years suggests the mere existence of cultural stereotypes that assert the intellectual inferiority of these groups creates a threatening intellectual environment for stigmatized individuals a climate where anything they say or do is interpreted through the lens of low expectations This stereotype threat can ultimately interfere with intellectual functioning and academic engagement setting the stage for later differences in educational attainment career choice and job advancement

Excellence for All Jack Schneider, 2010 Excellence For All American Education Reform 1983-2008 examines the history of school reform in the United States over the past quarter century Specifically the work examines an approach to educational change best characterized by the phrase excellence for all an equity focused policy phenomenon uniquely situated for the policymaking context of the late twentieth and early twenty first centuries The idea of promoting excellence for all students united a broad enough coalition to pursue a truly national reform effort and captured the imaginations of leaders in state and local government at philanthropic foundations in colleges and universities and in school districts across the country Led by a corps of self-styled educational entrepreneurs aggressively pursuing reforms that they could take to scale the movement sought to remake the American high school piece by piece The dissertation examines this reform movement through the nation's three largest districts New York Chicago and Los Angeles and through three particular change efforts a physical plant reform the small schools movement a personnel reform Teach For America and a curricular reform the Advanced Placement Program The work aims to establish the ways in which this most recent era of school reform represented a departure from previous reform eras strives to explain the movement's broad appeal and ultimately aims to understand its shortcomings by exploring the assumptions underlying the excellence for all approach and the tradeoffs required by it
