Conservation Sofie Van Parijs, Joseph Appiott, Leslie New, Piers Dunstan, Giuseppe Notarbartolo di Sciara, 2024-05-24 The ocean is under increasing threat from the expansion of human activities. The combined impacts of these threats as well as the potential impacts of climate change and ocean acidification have placed thousands of species at risk of extinction and have impaired the structure, function, productivity and resilience of marine ecosystems. Currently, some parts of the world's oceans are significantly impacted yet are without any form of effective management. Only a small proportion of the oceans are within protected area systems. Globally, measures are being taken to increase protection and sustainable management, but application is uncoordinated and not always effective. In order to support effective policy action by countries and competent international and regional organizations, it is critical to build a sound understanding of the most ecologically and biologically important ocean areas that support healthy marine ecosystems so that the necessary steps to ensure the long-term function and resilience of these systems can be taken. Handbook on the Politics of Antarctica Klaus Dodds, Alan D.

Hemmings, Peder Roberts, 2017-01-27 The Antarctic and Southern Ocean are hotspots for contemporary endeavours to oversee the last frontier of the Earth. The Handbook on the Politics of Antarctica offers a wide-ranging and comprehensive overview of the governance, geopolitics, international law, cultural studies and history of the region. Four thematic sections take readers from the earliest human encounters to contemporary resource exploitation and climate change. Written by leading experts, the Handbook brings together the very best interdisciplinary social science and humanities scholarship on the Antarctic and Southern Ocean. White, Brenna B.

Maddox, Carla A. Mazefsky, 2020 The Oxford Handbook of Autism and Co Occurring Psychiatric Conditions is the first sole source volume that synthesizes a vast amount of literature on all aspects of psychiatric comorbidity in autism *Cancer Epidemiology in China: What We Have Learnt So Far?* Jianguang Ji, Tianhui Chen, Xiaochen Shu, Hao Liu, 2020-04-13 After several decades of development the socialist market economy of China is now the world's second largest economy by nominal

GDP China is also the largest economy by purchasing power parity according to the International Monetary Fund In tandem with the development of the Chinese economy China's cancer burden is rising rapidly due to an ageing population and the adoption of unhealthy lifestyle behaviours According to the data from the National Central Cancer Registry NCCR of China the incidence and mortality of cancer have been increasing rapidly in China In recent years cancer has been the leading cause of death among city residents and the second cause of death among rural residents which has become a stark public health issue in China According to the NCCR an estimated 4.29 million new incident cases 12 thousand per day and 2.81 million death cases 7.5 thousand per day would occur in 2015 in China This corresponds to the age standardized incidence rate ASIR of 201.1 per 100 000 and age standardized mortality rate ASMR of 126.9 per 100 000 respectively Due to the geographical and ethnical disparities in living habits and healthcare level the cancer spectrum differs between different regions and ethnical groups in China According to the estimation from IARC the incidence of nasopharyngeal carcinoma and liver cancer is the world's highest in specific regions of China The incidence of some cancer types in Chinese urban areas such as colorectal prostate kidney and bladder cancers is similar to that in developed countries or regions where the incidence of cancer is highly associated with obesity and westernised lifestyles Nevertheless the incidence of some common cancer types in rural areas including oesophageal stomach liver and cervical cancers shares similarity with less developed countries or regions in the world where cancers are associated with chronic infectious agents due to poverty In addition the mortality rate is higher in rural areas which suggests a poorer cancer prognosis due to late diagnosis and/or unsatisfying clinical treatment The distinct cancer patterns of different regions and/or ethnic groups indicate a need for precise cancer prevention and control plans tailored for different geographical regions and/or ethnic groups The overarching goal of the proposed Frontiers in Oncology Research Topic is to present current perspectives on cancer epidemiology in Chinese characteristics and provide current knowledge of cancer burden as well as cancer mortality to academic investigators clinicians and stakeholders from the translational clinical and public health communities

The Organizational Resilience Handbook Graham Bell, 2020-08-13 For businesses to grow and be successful their approach to resilience must be defined by a holistic and risk focused outlook rather than one which is narrow and dominated by event oriented continuity practices The Organizational Resilience Handbook shows that success is as much to do with innovation and the speed with which new products are brought to market as it is with organizations having to deal with unexpected crisis situations It comprehensively covers the full breadth and depth of the field and introduces related topics such as security safety e-commerce emerging technologies and customer experience Through adopting a strategic and progressive approach practitioners can apply the book's methodology to develop an in-depth understanding of resilience within their own organization and use it to effectively engage with the board and senior management in developing strategies for achieving greater resilience capability A range of high profile case studies such as Mercedes the UK's National Health Service Alibaba and BP help to illustrate the concept of

resilience by detailing characteristics and behaviours which confirm its meaning The Organizational Resilience Handbook is a practical guide to self assessment benchmarking performance and implementing resilience frameworks in any organization
