

EARTHQUAKE

An earthquake happens when the ground shakes. It's like a big wave beneath our feet. Buildings can shake and sometimes fall. People feel scared during earthquakes. They can happen suddenly, without warning. Earthquakes can cause a lot of damage. Sometimes, they make the ground crack open. People need to be careful during earthquakes. They should find a safe place to hide. After an earthquake, people help each other and fix what's broken. Scientists study earthquakes to understand them better and to keep people safe. Earthquakes remind us of the power of nature.

Social Identities and Multiple Selves in Foreign Language Education Damian J. Rivers,Stephanie Ann Houghton,2013-07-18 Within foreign language education contexts across the globe inadequate attention has been paid to documenting the dynamics of identity development negotiation and management This book looks at these dynamics in specific relation to otherness in addition to attitudinal and behavioural overtones created through use of the term foreign despite its position as an integral marker in language acquisition discourse This book argues that individual identities are multidimensional constructs that gravitate

around a hub of intricate social networks of multimodal intergroup interaction The chapters pursue a collective desire to move the notion of identity away from theoretical abstraction and toward the lived experiences of foreign language teachers and students While the identities entangled with these interactions owe a significant measure of their existence to the immediate social context they can also be actively developed by their holders The collection of chapters within this book demonstrate how foreign language education environments traditional and non traditional are ideal locations for the development of a sophisticated repertoire of discursive strategies used in the formulation navigation expression and management of social identities and multiple selves **New Horizons in Learning English Iii (worktext)1st Ed. 1999 ,**
