

Week 10, Part 1: Nervous System

Complete this study guide as you work through the Week 8, Part 1 Lessons to help you prepare for the Unit 3 Exams. The complete study guide may be submitted through the submission link in Canvas for up to 2 points of extra credit (depending on completeness). **Please make a copy by clicking on 'file' in the upper left corner and fill this in using a different color font.**

Chapter 8: Introduction & Sections 8.1-8.6

1. Which two organ systems coordinate the activities of all of the other organ systems?
Nervous system and endocrine system
2. List three functions of the nervous system.
 - a. **Monitors the body's internal and external environments**
 - b. **Integrates sensory information**
 - c. **Coordinates voluntary and involuntary responses of many other organ systems**
3. The nervous system has two major divisions: the **central nervous system**, consisting of the brain and spinal cord; and the **peripheral nervous system**, consisting of the cranial and spinal nerves.
4. The PNS has two divisions: the **afferent** division and the **efferent** division.
5. The efferent division of the PNS is divided into the **somatic** nervous system, which allows voluntary control of skeletal muscles, and the **autonomic** nervous system, which is an involuntary system that automatically controls smooth muscle, cardiac muscle, and glands.
6. What are the two primary types of cells found in nervous tissue and what are their functions?
 - a. **Neurons: basic functional units of the nervous system**
 - b. **Neuroglia: regulate environment around the nucleus, supporting framework for neural tissues, and acts as a phagocytes**
7. Match the following parts of the neuron and their function:

<u> B </u> Dendrites	A- conductive region; generates an action potential
<u> C </u> Soma (cell body)	B- input area; receives signals from other neurons
<u> A </u> Axon	C- main nutritional and metabolic area
8. **Sensory** neurons carry information toward the CNS.
9. **Motor** neurons carry information away from the CNS.
10. **Interneurons** relay signals from one neuron to another.

The Student's Guide to Social Neuroscience Jamie Ward, 2022-11-17 This engaging and cutting edge text provides an accessible introduction to the complex methods and concepts of social neuroscience with examples from contemporary research and a blend of different pedagogical features helping students to engage with the material including essay questions summary and key points further reading suggestions and links to online resources Social neuroscience is a rapidly growing field which explains using neural mechanisms our ability to recognize understand and interact with others Concepts such as trust revenge empathy prejudice and identity are now being explored and unraveled by neuroscientists The third edition of this ground breaking text has been thoroughly revised and expanded to reflect the growing volume of evidence and theories in the field Notable additions include a greater emphasis on genetic influences hormonal influences and more detail on methods such as fNIRS multivariate pattern analysis and heart based psychophysiological measures This edition also provides new material on gender identity and sexuality constructivist theories of emotion compassion versus empathy the dark triad and altruistic punishment The book is supported by a fully updated companion website featuring student resources including lecture recordings multiple choice questions and useful web links as well as PowerPoint slides for lecturers Richly illustrated in attractive full color with figures boxes and real world implications of research this text is the ideal introduction to the field for both undergraduate and postgraduate students in fields such as psychology and neuroscience

Immunology and Liver M.P. Manns, Marianne Manns, G. Paumgartner, U. Leuschner, 2000-08-31 In 1992 the Falk Symposium No 70 dealt with the topic Immunology and Liver At that time basic mechanisms of immunology as well as immunopathogenetic mechanisms in viral and autoimmune liver diseases were discussed Now 7 years later the Falk Symposium No 114 held in Basel Switzerland October 20 21 1999 Part I of the Basel

Liver Week 1999 focused on immunology in autoimmune liver diseases. In the first section basic mechanisms of autoimmunity are presented including the relevance of superantigens and the role of apoptosis. A further topic is the latest developments concerning animal models for autoimmune diseases. Recently the International Autoimmune Hepatitis Group newly defined and reclassified the syndrome of autoimmune hepatitis. Autoimmune hepatitis is now identified and studied in all parts of the world including Asia and South America. A special variant of autoimmune hepatitis was identified as one organ manifestation of the autoimmune polyendocrine syndrome type 1, a genetic disease caused by mutations in a single transcription factor. Drug and hepatitis virus induced immune mediated liver diseases may serve as models for nonhepatic immune mediated disorders. DNA technology has increased our knowledge of the immunogenetic background of autoimmune liver diseases. Among the cholestatic immune mediated liver diseases significant progress has been made concerning primary biliary cirrhosis, in particular regarding the identification of mitochondrial antigens and the characterisation of the immune reactions directed at them. The involvement of infectious agents in PBC as well as the definition of overlap syndromes is a particular focus for basic and clinical research in this area. Concerning the therapy of autoimmune liver diseases corticosteroids and azathioprine remain the state of the art for autoimmune hepatitis while bile acids have become well established in treatment of primary biliary cirrhosis as well as primary sclerosing cholangitis. New drugs in the future will include topical steroids such as budesonide and new immunosuppressive agents like mofetil mycophenolate. Liver transplantation is the treatment of choice for end stage liver diseases. All autoimmune liver diseases are among the best candidates for liver transplantation. Hopefully new therapeutic strategies based on the results obtained from experimental models will become everyday clinical practice in the next decade. Therefore this symposium concludes with a discussion.

Neuroscience for Rehabilitation Tony Mosconi, Victoria Graham, 2017-12-22. The first neuroanatomy text written specifically for physical therapy students. Instructors finally have a resource created specifically for physical therapy students taking a neuroanatomy course. Neuroanatomy for Physical Therapy provides readers with an understanding of the anatomical localization of brain function in order to help them accurately interpret the wealth of new human brain images now available. The author, a recognized expert in human nervous system development, includes numerous case studies with patient presentations and, due to its importance in physical therapy, extensive coverage of peripheral nerve damage. Content mirrors the standard physical therapy curriculum, freeing instructors from having to use neuroanatomy texts intended for medical students. Numerous line illustrations, angiography, and brain views from MRI and other imaging modalities. Author Tony Mosconi has been listed in the Who's Who of American Teachers four different years. *Pass PCCN!* Robin Donohoe Dennison, Kathleen Farrell, 2015-11-16. From the author of the bestselling *Pass CCRN* and *Pass CEN*, *Pass PCCN* applies Dennison's time tested approach to the Progressive Care Nursing Certification exam and follows the latest PCCN exam test plan with one or more chapters for each section of the exam. This all new review book features a thorough review in narrative

format for each chapter and covers all the content you need including the disorders unique to the PCCN to master the PCCN exam Learning Activities interspersed throughout the book as well as more than 900 review questions on the companion Evolve website are geared towards progressive care nurses and offer valuable test taking experience Content follows the latest PCCN test plan to ensure you have the most current information for exam preparation Companion Evolve website with more than 900 multiple choice review questions available in Study Mode or Exam Mode lets you self test online UNIQUE Learning Activities provide fun and stimulating ways to learn critical concepts such as crossword puzzles matching and fill in the blank questions Case studies consisting of patient scenarios and associated learning activities stimulate critical thinking and promote application of knowledge Appendices include common abbreviations and acronyms laboratory values formulas hemodynamic monitoring essentials and a dysrhythmias reference including etiology criteria significance and management so you can quickly reference important information when studying for the PCCN examination The Human Body: Nervous, Sensory, Respiratory Systems Melba Calendar, 2022-07-25 Grade Level 4 12 Interest Level 5 12 Reading Level 3 4 Give your students a clear understanding of the body systems with this comprehensive and informative unit From nerves to the sense of smell and tasting to lung functions students will learn about three major systems of the human body in this 28 lesson unit As students gain a better understanding of the human body they enhance their reading and comprehension skills Examples What is the difference between sensory nerves and motor nerves What part of the eye is the iris What part of the ear is a hollow snail shaped bone How is oxygen used by the body Contents Include Glossary Preview Pages Vocabulary Lists Informative Readings Fact pages Diagrams Experiments Crossword puzzle and word search that can be used as pre post tests *The nutritional immunological effects and mechanisms of chemical constituents from the homology of medicine and food* Peng Ji, Yi Wu, Guiyan Yang, 2023-07-20 Brain Teasers Carol Eichel, 1993-10 *Saunders Medical Assisting Exam Review* Deborah E. Barbier Holmes, 2013-09-10 A comprehensive guide to prepare certification candidates to successfully pass either the AAMA sponsored CMA exam or the AMT sponsored RMA Each pre and post test is 300 questions the same number as the AAMA national certification exam and are formatted in a the same way with the same question type A practice CD ROM contains 800 additional questions in the same format found in the actual DMA and RMA certification exams

NTSE-NMMS/ OLYMPIADS Champs Class 8 Science/ Social Science Volume 1 Disha Experts, 2017-09-02 The NTSE NMMS OLYMPIADS Champs Class 8 Science Social Science is a thoroughly revised comprehensive book written exclusively for class 8 students and covers syllabus of classes 6 7 8 The book provides learning of all the concepts involved in the syllabus of NTSE NMMS OLYMPIADS exams The book covers the 2 sections conducted in these examination Science and Social Science Salient features of the book The book is prepared on content based on National Curriculum Framework prescribed by NCERT All the text books syllabi and teaching practices within the education programs in India must follow NCF Hence NTSE NMMS OLYMPIADS Champs become an ideal book not only for the NTSE NMMS OLYMPIAD Exams but

also for strengthening the concepts of the relevant class The Science section has been divided into 3 parts Physics Chemistry and Biology There are 10 chapters in Physics 6 in Chemistry and 7 in Biology as per the syllabus of the NTSE NMMS OLYMPIADS exams The Social Science section has also been divided into 3 parts History Civics and Geography There are 13 chapters in History 9 in Geography and 8 in Civics as per the syllabus of the NTSE NMMS OLYMPIADS exams The book provides sufficient point wise theory solved examples followed by FULLY SOLVED exercises in 2 levels The book has the most comprehensive coverage as per the latest syllabus of class 6 7 8 Maps Diagrams and Tables to stimulate the thinking ability of the student The book also contains very similar questions to what have been asked in the previous NTSE NMMS OLYMPIADS examinations of Class 8 There is an exhaustive range of thought provoking questions in MCQ format to test the student s knowledge thoroughly The questions are designed so as to test the knowledge comprehension evaluation analytical and application skills Solutions and explanations are provided for all questions The book covers new variety of Multiple Choice questions Passage Based Assertion Reason Matching Definition based Feature Based Diagram Based and Integer Answer Questions The book will act as a quick revision of the complete syllabus of class 8 Study Guide for Introduction to Human Anatomy and Physiology - E-Book - Revised Reprints Lois A Ball,2016-11-15 Study Guide for Introduction to Human Anatomy and Physiology E Book Revised Reprints
