Figures in Mechanism and Machine Science Marco Ceccarelli,2009-12-01 This is the second volume of a series of edited
books whose aim is to collect contributed papers within a framework that can serve as a collection of persons in MMS
Mechanism and Machine Science This is a continuation of the first volume that was published in 2008 again combining very
ancient and very recent scholars in order to give not only an encyclopaedic character to this project but also to emphasize
the significance of MMS over time This project has the characteristic that the papers illustrate by recognizing persons and
their scientific work mainly technical developments in the historical evolution of the fields that today are grouped in MMS
Thus emphasis is also given to biographical notes describing efforts and experiences of people who have contributed to the
technical achievements whose technical survey is the core of each contributed paper This second volume of the project has
been possible thanks to the invited authors who have enthusiastically shared in this initiative and who have spent time and
effort in preparing the papers The stand alone papers cover the wide field of the History of Mechanical Engineering with
specific focus on MMS I believe that readers will take advantage of the papers in this book and future ones by supplying
further satisfaction and motivation for her or his work historical or not **Rearing and Capsizing of Tractors** Food and
