Intelligent Systems for Crisis Management Sisi Zlatanova, Rob Peters, Arta Dilo, Hans Scholten, 2012-12-03 There have been major advances in technologies to support crisis response in the last few years. However, many aspects related to the efficient collection and integration of geo information, applied semantics, and situation awareness for disaster management are still open. To advance the systems and make them intelligent, an extensive collaboration is required between emergency responders, disaster managers, system designers, and researchers. To facilitate this process, the Geo information for Disaster Management Gi4DM conference has been organized since 2005. Gi4DM is coordinated by the Joint Board of Geospatial Information Societies, JB GIS, and the ad hoc Committee on Risk and Disaster Management. This volume presents the results of the Gi4DM 2012 conference held in Enschede, the Netherlands, on 13-15 December. It contains a selection of around 30 scientific and 25 best practice peer-reviewed papers. The 2012 Gi4DM focuses on the intelligent use of geo information, semantics, and situation awareness.

Investigating the Social World with SPSS Student Version 14.0 Russell Schutt, 2006-03-06 Praise for the Fourth Edition: I think this volume is a good textbook, and if I were teaching a research methods subject, I would consider using it as a core text. The extensive study aids are a particularly attractive aspect of the book as a teaching pool. *Qualitative Research Journal*: The continually updated and expanded *Investigating the Social World* now in its Fifth Edition is written so that the doing of social research is closely and consistently linked to important social issues, demonstrating not only the value of research but also how technique and substance are intimately related. The text offers guides for critiquing research articles, exercises for applying research skills, and the examples of analyzing and reporting social data provide instructors with key supports for effective teaching. Ethical concerns and ethical decision making are treated in tandem with each study of specific methods, and an emphasis on how to do research is joined with an equal emphasis on giving students the critical skills necessary to evaluate research done by others.

The Practice of Research in Criminology and Criminal Justice Ronet Bachman, Russell K. Schutt, 2007 This text provides a practical guide to qualitative and quantitative social research techniques integrated with issues from criminal justice.

The Palgrave Handbook of Applied Creativity in Global Higher Education Gerard J. Puccio, Amanda Lohiser, Camille A. McKayle, Frederik Hertel, 2025-09-30 This handbook explores how colleges and universities worldwide are fostering creativity as an essential skill for success in today's complex and fast-changing world. Featuring over 30 case studies, this volume presents innovative curricula, certificates, degrees, and initiatives designed to equip students with the creative thinking and problem-solving skills demanded in today's workplace. Despite the growing recognition of creativity as a crucial life and work skill, few institutions explicitly offer programs to cultivate it. This volume bridges that gap, presenting real-world examples.
