Secular Stagnation Theories Christina Anselmann,2020-04-17 In light of weak economic performances and rising income disparities across the developed world during the past decades this book provides a comprehensive overview of secular stagnation theories in the history of economic thought and examines the role of income distribution in various stagnation hypotheses By offering a historical perspective from the classical economists to the most recent stagnation debate of the early twenty first century the author shows that most stagnation theories were developed in periods of high and or rising income disparities Eventually it was Josef Steindl one of the least recognized stagnationists in the history of economic thought who put the distribution of income at the heart of his stagnation theory While Josef Steindl focused on the nexus between the functional distribution of income and economic growth this book includes the personal distribution of income in a Kaleckian Steindlian model of economic growth and stagnation In the model presented the nexus between economic growth and the distribution of income is a priori uncertain depending on the type of economic shock and the specific economic circumstances The author also discusses various empirically oriented policy implications aimed at fostering both economic growth and a more equal distribution of income This book appeals to scholars in economics and the history of economic thought interested in economic growth secular stagnation and income distribution *Our Social World* Dr Jeanne H Ballantine,Keith A. War and Religion after Westphalia, 1648-1713 David Onnekink,2016-03-03 Many historians consider the Peace of Westphalia which ended the Thirty Years War in 1648 to mark a watershed in European international relations It is generally agreed that Westphalia brought to an end more than a century of religious conflicts and marked the beginning of a new era in which secular power politics was the prime motivating factor in international relations and warfare The purpose of this volume is to question this assumption and reconceptualise the relationship between war foreign policy and religion during the period 1648 to 1713 Some of the contributions to the volume directly challenge the idea that religion ceased to play a role in war and foreign policy Others confirm the traditional view that religion did not play a dominant role after 1648 but

seek to re evaluate its significance and thereby redefine religious influences on policy in this period By exploring this issue from various perspectives the volume offers a unique opportunity to reassess the influence of religion in international politics It also yields deeper insights into concepts of secularisation and complements the research of many social and cultural historians who have begun to challenge the idea of a decline in the influence of religion in domestic politics and society By matching the relationship between conflict and religion with this scholarship a more nuanced appreciation of the European situation begins to emerge

The Rise and Fall of Neoliberal Rentier Capitalism Luiz Carlos Bresser-Pereira,2025-02-10 The Rise and Fall of Neoliberal Rentier Capitalism is an account of the political economy of capitalism in the 20th and 21st centuries Capitalism is an unjust form of economic organisation it is a culture of exacerbated individualism justified by the glorification of individual competition Today after 40 years of neoliberalism capitalism faces again a legitimization crisis The book discusses capitalism after two revolutions the Organisational Revolution and the Democratic Revolution It views capitalism since the New Deal in the US and the post war as a progressive and developmental era and the Neoliberal Turn as the change from social democracy to radical and regressive global neoliberalism which was a regressive time for almost forty years In the Neoliberal Years rentiers replaced entrepreneurs in the command of the economy and called on the financiers to manage their wealth and serve as organic intellectuals and both mounted an attack to the state which is the main capitalist institution The global crisis and in 2020 the Covid pandemic showed that the state remains the nations resource of last instance The transition of China from statism to an active developmentalism resulted in an extraordinary growth Given such realities in 2021 we saw the collapse of neoliberalism and in the United States a Developmental Turn the state is back in the economy The transition phase we live in is characterised by three main forces economic liberalism managerialism and democracy Economic liberalism is the great defeated managerialism became powerful and is developmental and democracy is the stronger force It was attacked by neoliberalism and is now being attacked by right wing populism but resisted and resists brilliantly proving that it was a conquest of the popular classes that became a universal value counting on the support of all
