

12 (a) Calculate $(6.5 \times 10^{10}) - (4.5 \times 10^9)$.

$$\begin{aligned} 6.5 \times 10^{10} - 4.5 \times 10^9 &= (6.5 \times 10^{10}) - (0.45 \times 10^{10}) \\ &= (6.5 - 0.45) \times 10^{10} \\ &= \underline{6.05 \times 10^{10}} \end{aligned}$$

$$6.05 \times 10^{10}$$

(2)

(b) Write the following numbers in order.
Start with the smallest number.

$$1.5 \times 10^3$$

$$5.5 \times 10^4$$

Phishing for Phools George A. Akerlof, Robert J. Shiller, 2016-08-16 Why the free market system encourages so much trickery even as it creates so much good Ever since Adam Smith the central teaching of economics has been that free markets provide us with material well being as if by an invisible hand In Phishing for Phools Nobel Prize winning economists George Akerlof and

Robert Shiller deliver a fundamental challenge to this insight arguing that markets harm as well as help us As long as there is profit to be made sellers will systematically exploit our psychological weaknesses and our ignorance through manipulation and deception Rather than being essentially benign and always creating the greater good markets are inherently filled with tricks and traps and will phish us as phools Phishing for Phools therefore strikes a radically new direction in economics based on the intuitive idea that markets both give and take away Akerlof and Shiller bring this idea to life through dozens of stories that show how phishing affects everyone in almost every walk of life We spend our money up to the limit and then worry about how to pay the next month s bills The financial system soars then crashes We are attracted more than we know by advertising Our political system is distorted by money We pay too much for gym memberships cars houses and credit cards Drug companies ingeniously market pharmaceuticals that do us little good and sometimes are downright dangerous Phishing for Phools explores the central role of manipulation and deception in fascinating detail in each of these areas and many more It thereby explains a paradox why at a time when we are better off than ever before in history all too many of us are leading lives of quiet desperation At the same time the book tells stories of individuals who have stood against economic trickery and how it can be reduced through greater knowledge reform and regulation

Social Entrepreneurship in the Greater China Region Yanto Chandra,Linda Wong,2016-03-31 This book offers the first exploration into the development of social enterprises in the Greater China region consisting of Hong Kong Macau Taiwan and Mainland China By drawing on the research and experience of over a dozen scholars and practitioners from across the area it offers a picture of how a strong State can play an important role as a catalyst in developing the social entrepreneurship sector particularly by legitimizing it

It delves into the role and impact of institutions and policy on the development of social enterprises and explains how micro and macro factors might interact in influencing social entrepreneurship. Structured in two parts, policy and cases, it reveals the historical development of the Social enterprises sector in the Chinese context and then illustrates this using cases studies. Providing an alternative view of social entrepreneurship by highlighting the importance of context in this new sector, the book questions whether or not social entrepreneurship is preferable to more conventional models of development. Sparking new interest and offering fresh insight into social entrepreneurship in the Greater China region, this book will be useful to students and scholars of Chinese Studies, Business Studies and Sociology.

Post-Trial Access to Drugs in Developing Nations Evaristus Chiedu Obi, 2017-07-26. This book begins the discourse on post trial access to drugs in developing countries. Underlying ethical issues in global health inequalities and global health research serve as the context of the debate. Due to rampant allegations of violations of rights of research participants especially in developing countries, it discusses the regulatory infrastructure and ethical oversight of international clinical research, thus emphasizing the priority of safeguarding the rights of research participants and host populations as desiderata in conducting clinical trials in developing countries. This is the first book that analyzes the major obstacles of affordable access to drugs in developing countries: patent and non patent factors and how they can be overcome through a middle ground approach and a new paradigm to establish global health justice which includes national and global health responsibilities. The book also deals extensively with all complex aspects of the discourse on affordable access to drugs in developing countries including intellectual property law, international regulations, political and cultural systems, international trade agreements. Furthermore, it contains a robust ethical debate and in depth analysis. The book crafts a paradigm of global health justice involving a sliding scale of national and global responsibilities for the realization of the right to health in general and access to drugs in particular.
