Conceptual Modeling - ER 2010 Jeffrey Parsons, Motoshi Saeki, Peretz Shoval, Carson Woo, Yair Wand, 2010-10-27
This publication comprises the proceedings of the 29 International Conference on Conceptual Modeling ER 2010 which was held this year in Vancouver British Columbia Canada Conceptual modeling can be considered as lying at the confluence of the three main aspects of information technology applications the world of the stakeholders and users the world of the developers and the technologies available to them Conceptual models provide abstractions of various aspects related to the development of systems such as the application domain user needs database design and software specifications These models are used to analyze and define user needs and system requirements to support communications between stakeholders and developers to provide the basis for systems design and to document the requirements for and the design rationale of developed systems Because of their role at the junction of usage development and technology conceptual models can be very important to the successful development and deployment of IT applications Therefore the research and development of methods techniques tools and languages that can be used in the process of creating maintaining and using conceptual models is of great practical and theoretical importance Such work is conducted in academia research institutions and industry Conceptual modeling is now applied in virtually all areas of IT applications and spans varied domains such as organizational information systems systems that include specialized data for spatial temporal and multimedia applications and biomedical applications

The Hidden Pattern Ben Goertzel, 2006 The Hidden Pattern presents a novel philosophy of mind intended to form a coherent conceptual framework within which it is possible to understand the diverse aspects of mind and intelligence in a unified way The central concept of the philosophy presented is the concept of pattern minds and the world they live in and co create are viewed as patterned systems of patterns evolving over time and various aspects of subjective experience and individual and social intelligence are analyzed in detail in this light Many of the ideas presented are motivated by recent research in artificial intelligence and cognitive science and the author's own AI research is discussed in moderate detail in one chapter However the scope of the book is broader than this incorporating insights from sources as diverse as Vedantic philosophy psychedelic psychotherapy Nietzschean and Peircean metaphysics and quantum theory One of the unique aspects of the patternist approach is the way it seamlessly fuses the mechanistic engineering oriented approach to intelligence and the introspective experiential approach to intelligence

Digital Knowledge Maps in Education Dirk Ifenthaler, Ria Hanewald, 2013-11-01 Digital knowledge maps are at a glance visual representations that enable enriching imaginative and transformative ways for teaching and learning with the potential to enhance positive educational outcomes The use of such maps has generated much attention and interest among tertiary education practitioners and researchers over the last few years as higher education institutions around the world begin to invest heavily into new technologies designed to provide online spaces within which to build resources and conduct activities The

key elements of this edited volume will comprise original and innovative contributions to existing scholarship in this field with examples of pedagogical possibilities as they are currently practiced across a range of contexts It will contain chapters that address theory research and practical issues related to the use of digital knowledge maps in all aspects of tertiary education and draws predominantly on international perspectives with a diverse group of invited contributors Reports on empirical studies as well as theoretical conceptual chapters that engage deeply with pertinent questions and issues raised from a pedagogical social cultural philosophical and or ethical standpoint are included Systematic literature reviews dealing with digital knowledge mapping in education are also an integral part of the volume Resources in Education ,1997

The Pattern Kevin Jeffers,2023-01-21 WHAT IS THE PATTERN This book shares my experiences as a soul traveler healer and energy specialist It teaches how to achieve spiritual freedom through a unique expression of consciousness I discovered this insight when my consciousness left my body during a deep meditation Focusing my attention I found myself in a limitless field of clear sparkling blue and white lines that intersected These energy lines formed a grid pulsating with starry lights the countless manifestations of consciousness striving for greater self awareness What I experienced that day what I call the Pattern informed the rest of my life Striving to know my soul s origin and destination I continue to merge with the Pattern to experience the Creator s intent the uplift of all forms of consciousness The Pattern points to a pathway for you to experience a greater knowledge of Spirit s ultimate design This is a story of revelation and action of the journey undertaken on the path to conscious living in both the physical and nonphysical worlds It is not an easy path but made smoother by the insights that Kevin Jeffers brings to the subject His stories are compelling His prose helps illuminate what is essentially ineffable Kevin brings a new lens on the two most fundamental inquiries of our time the nature of Spiritual revelation and uplift of consciousness DR SCOTT TAYLOR Former President Executive Director of the Monroe Institute

The Present and Future of Immunology Education Andrea Bottaro, Deborah M. Brown, John Gregory Frelinger, 2022-01-24 The explosion of basic and applied immunology in the first decades of the 21st century has brought forth new opportunities and challenges for immunology education at all academic levels from professional to undergraduate medical graduate and post graduate instruction Moreover developing methods and techniques for educating general audiences on the importance and benefits of immunology will be critical for increasing public awareness and support One major immediate challenge consists in accommodating within the confines of traditional immunology curricula a body of knowledge that continues to grow exponentially in both size and complexity Furthermore the practical toolbox of immunological research has vastly expanded and even in the present environment of highly interdisciplinary and collaborative science future immunologists will likely need to be at least conversant in for instance computational structural and system biology nanotechnology and tissue engineering At the same time our perspective of the immune system has progressively developed from primarily a host defense mechanism to a fundamental homeostatic system with organism wide physiological and clinical significance and with potentially transformative biotechnological and therapeutic applications As a consequence in addition to stand alone courses immunology is increasingly integrated into other courses or distributed longitudinally throughout a multi year curriculum This necessitates inter disciplinary approaches to reach an expanding range of disciplines as diverse as neurobiology cancer biology oncology infectious diseases

pharmacology orthopedics and bioengineering Creative approaches and pedagogical flexibility will be needed to avoid the pitfall of one size fits all instruction and to tailor level and discipline appropriate content to different types of students using multiple teaching formats Finally like most other disciplines immunology education is also under strong pressure to introduce new didactic strategies that are relevant and meaningful to a generation of students who are digital natives comfortable with and expect on demand and multi modal learning diversified sources and active engagement Thankfully the dynamic and interactive behavior of immune system cells now visualized with striking immediacy by in vivo imaging has the ability to capture and hold the interest of even the most jaded learner The need for an increasingly immunology knowledgeable workforce not just academic and industry scientists but also clinical and research lab technicians biomedical engineers and physicians in a growing array of specialties will also expand job opportunities for immunologists as educators and for content creators dedicated to generating new didactic tools in this field Acknowledgement We acknowledge the initiation and support of this Research Topic by the International Union of Immunological Societies IUIS **WILLIAM WALKER ATKINSON**
