The IBM PC, XT, PCjr Educational Software Directory Gerald Van Diver,1984 *Student Learning Communities* Douglas Fisher,Nancy Frey,John Almarode,2020-11-25 Student learning communities SLCs are more than just a different way of doing group work Like the professional learning communities they resemble SLCs provide students with a structured way to solve problems share insight and help one another continually develop new skills and expertise With the right planning and support dynamic collaborative learning can thrive everywhere In this book educators Douglas Fisher Nancy Frey and John Almarode explain how to create and sustain student learning communities by Designing group experiences and tasks that encourage dialogue Fostering the relational conditions that advance academic social and emotional development Providing explicit instruction on goal setting and opportunities to practice progress monitoring Using

thoughtful teaming practices to build cognitive metacognitive and emotional regulation skills Teaching students to seek give and receive feedback that amplifies their own and others learning and Developing the specific leadership skills and strategies that promote individual and group success Examples from face to face and virtual K 12 classrooms help to illustrate what SLCs are and teacher voices testify to what they can achieve No more hoping the group work you re assigning will be good enough or that collaboration will be its own reward No more crossing your fingers for productive outcomes or struggling to keep order assess individual student contributions and ensure fairness Student Learning Communities shows you how to equip your students with what they need to learn in a way that is truly collective makes them smarter together than they would be alone creates a more positive classroom culture and enables continuous academic and social emotional growth

The Software Encyclopedia ,1988 *Mathematics Teaching in the Middle School* ,2009-08 **Volume 1: Research Syntheses** M. Kathleen Heid,Glendon W. Blume,2008-07-01 According to NCTM s Principles and Standards for School mathematics Technology is essential in teaching and learning of mathematics it influences the mathematics that is taught and it enhances students learning How does research inform this clarion call for technology in mathematics teaching and learning In response to the need to craft appropriate roles for technology in school mathematics new technological approaches have been applied to the teaching and learning of mathematics and these approaches have been examined by researchers world wide The first volume provides insight into what research suggests about the nature of mathematics learning in technological environments Included in this volume are syntheses of research on technology in the learning of rational number algebra elementary and secondary geometry mathematical modeling and calculus Additional chapters synthesize research on technology in the practice of teaching and on equity issues in the use of technology in mathematics instruction Instead of simply reporting achievement scores of students who use technology in their learning authors provide thoughtful analyses of bodies of research with the goal of understanding the ways in which technology affects what and how students learn Each of the chapters in this volume is written by a team of experts whose own research has provided important guidance to the field *Resources in Education* ,1997 **Theorems in School** ,2007-01-01 During the last decade a revaluation of proof and proving within mathematics curricula was recommended great emphasis was put on the need of developing proof related skills since the beginning of primary school This book addressing mathematics educators teacher trainers and teachers is published as a contribution to the endeavour of renewing the teaching of proof and theorems on the basis of historical epistemological cognitive and didactical considerations Authors come from eight countries and different research traditions this fact offers a broad scientific and cultural perspective In this book the historical and epistemological dimensions are dealt with by authors who look at specific research results in the history and epistemology of mathematics with an eye to crucial issues related to educational choices Two papers deal with the relationships between curriculum choices concerning proof and the related implicit or explicit epistemological assumptions and historical traditions

in two different school systems and the teaching and learning of proof there The cognitive dimension is important in order to avoid that the didactical choices do not fit the needs and the potentialities of learners Our choice was to firstly deal with the features of reasoning related to proof mainly concerning the relationships between argumentation and proof The second part of this book concentrates on some crucial cognitive and didactical aspects of the development of proof from the early approach in primary school to high school and university We will show how suitable didactical proposals within appropriate educational contexts can match the great yet underestimated young students potentialities in approaching theorems and theories
