

Architecture In Helsinki Live

Patrick Tighe

Architecture In Helsinki Live:

Architecture INTL Nancy Solomon, 2008-05-27 On the occasion of its 150th anniversary the American Institute of Architects asked more than 70 contributors to examine the complex and evolving of the America s architects in shaping our cities and communities Through essays vignettes and profiles illustrated with more than 560 photographs *Architecture* provides a look at the breath and depth of the architecture profession and points to the significant contributions architects have made in all aspects of society Most important the book demonstrates the value of applying architectural thinking to the many serious issues from global warming and homeland security to accessibility and diversity facing our world today **BOOK JACKET** *Patrick Tighe Architecture* Patrick Tighe, 2016-08-20 This beautifully designed and illustrated monograph sets out Patrick Tighe s innovative diverse and wide ranging collection of contemporary work towards the post digital showing the reader a hyper detailed analytical investigation of digital forms and their practices It sets out how his architecture has brought a return to the real in an attempt to rethink the language and practice of architecture The book s many inspiring and intricate drawings render clear the ideas that show the palpable energy and momentum that exists in this practice In every instance this firm embraces dichotomy mining its potential to produce a more vital and consequential architecture The book s stunning imagery and nuanced narratives tell the story of Tighe s architecture across 35 projects spanning across the globe to help establish how his work draws from and builds upon existing polarities to find resolution and how tensions yield a more dynamic architecture The work is multiple and varied from the small scale residential to the urban scale from the United States to Europe to China to North Africa from high end villas for royalty to art installations to social housing projects This compelling collection of work follows the following five key themes **CRAFT** from the manufactured to the technological **MATERIAL** from the natural to the synthetic **EXPERIENCE** from the actual to the perceptual **GEOMETRY** from the simple to the complex and **METHOD** from the analog to the digital This distinguished monograph also includes an incisive introduction by Patrick Tighe and is augmented by two essays by Thom Mayne and Stephen Phillips who also provide clarity and insightful discourse on how Tighe s work is continuously in transition and evolving and how he s rethinking and engaging in a discourse to defamiliarize the familiar *The Architects* Joseph J. Thorndike Jr., 2017-04-26 Here is the story of America s greatest architects whose designs and structures have changed the world Charles Bulfinch Benjamin Latrobe Thomas Jefferson Frank Lloyd Wright Eliel and Eero Saarinen to name but a few From the United States Capitol building designed in Old World style to modern private residences like Fallingwater from Boston s Trinity Church to the White City of the Chicago World s Fair these buildings define the nation **Mind in Architecture** Sarah Robinson, Juhani Pallasmaa, 2017-03-03 Leading neuroscientists and architects explore how the built environment affects our behavior thoughts emotions and well being Although we spend more than ninety percent of our lives inside buildings we understand very little about how the built environment affects our behavior thoughts emotions and well being We are biological beings whose senses and neural

systems have developed over millions of years it stands to reason that research in the life sciences particularly neuroscience can offer compelling insights into the ways our buildings shape our interactions with the world This expanded understanding can help architects design buildings that support both mind and body In *Mind in Architecture* leading thinkers from architecture and other disciplines including neuroscience cognitive science psychiatry and philosophy explore what architecture and neuroscience can learn from each other They offer historical context examine the implications for current architectural practice and education and imagine a neuroscientifically informed architecture of the future Architecture is late in discovering the richness of neuroscientific research As scientists were finding evidence for the bodily basis of mind and meaning architecture was caught up in convoluted cerebral games that denied emotional and bodily reality altogether This volume maps the extraordinary opportunity that engagement with cutting edge neuroscience offers present day architects Contributors Thomas D Albright Michael Arbib John Paul Eberhard Melissa Farling Vittorio Gallese Alessandro Gattara Mark L Johnson Harry Francis Mallgrave Iain McGilchrist Juhani Pallasmaa Alberto Perez Gomez Sarah Robinson

Modern Architecture Alan Colquhoun, 2002-04-25 This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures The work of the main architects of the movement such as Frank Lloyd Wright Adolf Loos Le Corbusier and Mies van der Rohe is re examined shedding new light on their roles as acknowledged masters Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of form function social engagement modernity and tradition

Finnish Summer Houses Jari Jetsonen, Jari Jetsonen Sirkkaliisa, 2008-03-20 Summer is when Finland is at its spellbinding best Emerging from a seven month long winter Finns head outdoors to savor the magical light of the all too brief Scandinavian summer Cityscapes give way to pristine lakes endless forests and idyllic seaside vistas The Finnish summer house offers a unique opportunity for their owners to relax get back in touch with nature and enjoy outdoor activities such as boating swimming and hiking Not surprisingly the architecture of the Finnish summer house occupies an almost mythic even mystical place in the hearts of their inhabitants as well as their architects Indeed many Finnish architects regard the design of their own summer residence or weekend studio as one of their most important works For them the summer house is not only a place to spend leisure time but also a chance to study specific technical details and experiment with new spatial concepts Finnish Summer Houses presents in detail twenty villas cottages and cabins by architects such as Eliel Saarinen Oiva Kallio Alvar Aalto and Juhani Pallasmaa among many others Authors Jari and Sirkkaliisa Jetsonen use contemporary photographs archival images drawings and plans to illustrate the diversity found in the designs of Finnish summer residences From Lars Sonck's Lassas Villa 1895 with its traditional farmhouse elements and Alvar Aalto's Muuratsalo Experimental House 1952/54 to Erkki Kairamo's sparse Villa Aulikki 1995/2003 which seems to grow out of its landscape the works in this book are of a highly personal nature indeed most of the summer houses are still used by the architect or the families of their

children The very best examples of these fantastic summer homes are collected here making Finnish Summer Houses an inspiration for anyone dreaming about a summer home of their own [Rootedness](#) Juhani Pallasmaa, 2024-02-08 [rootedness](#) Discover the insights and lessons of architect Juhani Pallasmaa In [Rootedness](#) Reflections for Young Architects Juhani Pallasmaa delivers an insightful and expansive collection of his most compelling ideas into architecture's position among arts and culture Pallasmaa speaks to architecture students and young professionals discussing each topic with sincerity and openness suggesting what can be learned from areas of culture beyond the boundaries of familiar professional disciplines He outlines the growing need for an architecture based in self awareness reconnection to the environment and a sense of ethical responsibility Each essay in [Rootedness](#) was initially conceived and presented as an educational lecture and has been carefully edited with clarifications refinements and valuable expansions Accompanying sketches by the author emphasize the personal and intimate nature of the essays The book also includes Explorations of perception creative practice and the need for an ethical stance Thoughts meditations and challenges emerging from the author's search for identity and purpose in his architectural work A wealth of references within the essays as well as recommendations for books and films from which readers may draw further inspiration Designed for students of architecture at any age [Rootedness](#) Reflections for Young Architects will also inspire professional architects designers and those in other creative professions [Architecture Inspired by Nature](#) María Rosa Cervera Sardá, Elena-Codina Duşoiu, Tana Nicoleta Lascu, 2023-08-25 The book brings together the research completed during 10 editions of International Seminars of Bionics organized by the School of Architecture of the University of Alcal de Henares Madrid several of them in partnership with the Ion Mincu University of Architecture and Urbanism Bucharest carried out in Spain and in Romania The articles here consider advanced bionic design principles implementing them to an impressive variety of application fields including but not limited to urban planning and landscape public space architecture and building structures design and detailing application of natural dynamic processes bio digital architecture innovative materials based on living organisms micro algae and nano modified materials A particular focus is given to light and perception of light To illustrate the principles developed this contributed volume includes descriptions and full color images of the experimental projects created during the workshops held in the framework of these ISB meetings Learning from Nature Integrating Bionics 2009 Adaptability Efficiency and Biostructures 2010 Bionics and Innovation 2011 Forms and Structures Inspired by Nature 2016 2017 Furniture Inspired by Natural Models 2018 Relation between Structure and Envelope Light Structures 2019 Light from Nature to Architecture Structures Inspired in Nature 2020 Light in Architecture and Design A Bionic Perspective 2021 Sustainable Thinking and Bionics 2022 [Encounters with Architecture](#) Howard Davis, 2025-12-04 The hundred places of this book were visited over several decades and played an important role in Davis's career Insights come from everyday places and famous landmarks some beautiful some the product of fine craftsmanship some active places of gathering or commerce some quiet places of contemplation All stayed in the author's

memory helping build the framework of his understandings of what is important to people in architecture and cities Organized chronologically the book begins with the author's encounters with buildings and places as a child in New York and leads to his most recent architectural experiences as a seasoned professor scholar and traveler Each encounter is explained on two or three pages that bring out the reasons for its significance and the lessons learned from it Readers are encouraged to look for themselves and see how the places they encounter in their everyday lives and travels can enrich their own understandings about the built world that surrounds them Illustrated with beautiful photographs drawings and diagrams the book will interest people outside architecture who are fascinated by buildings and cities as well as teachers practitioners and students of architecture and cities

Architectural History Retold Paul Davies, 2015-08-27 How much do you know about Greek architecture Roman Gothic The Renaissance Modernism Perhaps more importantly do you know how these are connected or how one style evolved to become another Or what happened historically during each of these periods *Architectural History Retold* is your roadmap for your journey through architectural history Offering a fresh take on what the author calls the Great Enlightenment project it traces the grand narrative of western architecture in one concise accessible volume Starting in Ancient Greece and leading up to the present day Paul Davies' unconventional engaging style brings the past back to life helping you to think beyond separate components and styles to recognise the bigger picture The author is an academic and journalist with three decades of experience in introducing students to architectural history The book is based on his successful entry level course which has used the same unstuffy approach to break down barriers to understanding and engagement and inspire generations of students
