Grab Bag Laing's approach treats these math and various number related logic problems as fun brain exercises. Yes there are equations here but nothing that the average adult even those who always hated math class can't handle. There are also graphs geometry statistics and logic problems many of them centered around problems that could occur in real life. Think of Your Daily Math not as homework but instead as your daily cognitive workout.

Problem-solving in Mathematics Marcel Danesi, 2008. Problem solving in mathematics is seen by many students as a struggle. Since the capacity to count and understand basic arithmetical concepts adding taking away etc is innate and emerges effortlessly in childhood why does this negative perception and fear of problem solving exist. This book counteracts this perception by providing a semiotic analysis of problem solving and from this analysis constructing a pedagogical framework for teaching problem solving that is consistent with the psychology of how humans learn to use signs and symbols. It is based on an experimental math course designed to impart fluency in problem solving through semiotic training. The positive results of that course inspired the writing of this book.
