

Zoos: Failing animals, conservation and education

Craig Redmond

Speaking of the Captive Animals' Protection Society's (CAPS) opposition to zoos' confinement of animals, zoo director Ben Mee recently said: 'Actually, I can see their point; I don't particularly like looking at animals behind wire either. But, as a zoo director, I understand that it is absolutely essential that we keep them there' (Mee 2010).

The subheading to this spread in *The Guardian's* G2 supplement in August 2010 referenced the fact that the zoo had just gone into liquidation: 'his little zoo is struggling against extinction – just like the endangered species he cares for'.

In these two comments we see the perpetuation of the myths that help keep zoos in existence: that they house and breed endangered animals and are necessary for the survival of these species.

Both claims are false but they make a story that all too many people are willing to believe. Zoos need to sustain the mythology because it keeps them in business. The public want to believe in it as it helps reduce any feelings of guilt they have in enjoying a day out watching wild animals in cages, rocking back and forth. And regional newspapers can't get enough of stories about their local zoo (tourist attractions and major advertisers), reprinting any press release the zoo sends their way.

Love affair with zoos

What is it that makes zoos so popular? At the end of the Second World War there were only 14 in Britain, slowly increasing to 31 by 1959. Over the next decade an average of one new zoo opened every six weeks, adding another 100 to the 1959 figure.

Now, every year, 24 million people are said to visit just the zoos that are members of the British trade body the British and Irish Association of Zoos and Aquariums (BLAZA), which actually only represents a fraction of the 400 licensed zoos in the UK and not all of the major ones. BLAZA members alone turn over £215m annually. Zoos are always amongst the top tourist attractions, nationally and locally, and are heavily promoted by tourism boards.

The earliest wild-animal keeping was probably for religious reasons (animals considered sacred were kept in or near temples in ancient Egypt), later becoming a sign of power and wealth. British royal menageries began during the reign of William II and in the 13th century Henry III moved the menagerie to the Tower of London. As early as the 16th century we see European zoos opening to the public but it was in 1847, when London Zoo opened to the public after 20 years as a collection for scientific study, that the real turning point came.
