Standard Modbus TCP protocol

You can use your industrial controller, e.g. PLC and standard TCP protocol to connect to the 1-Wire Gateway 20. Addressing is similar to other Modbus systems and easy to handle. You can use addresses for system data, sensor data and actuator devices. A complete address list including all available data points is available for [download](#) on our webpage. These addresses are also available within the ESERA configuration software Config-Tool 3.

Standalone controller

The 1-Wire Gateway 20 Modbus is designed to control 1-Wire Networks.
