Crit - An Architectural Student's Handbook Charles Doidge, Rachel Sara, Rosie Parnell, 2007-08-15 The architectural crit review or jury is a cornerstone of architectural education around the world. Students defend their ideas, drawings and models in open forum before staff and fellow students. What academic staff see as healthy creative debate students see as hostile confrontation, an ego trip for staff and humiliation for them. This accessible and readable book, written by students and illustrated by telling cartoons, guides them through this academic minefield with creative humour. It provides practical advice based on experience of many recent students and draws on recent experimentation at Sheffield University and De Montfort University Leicester. The aim is twofold: first to suggest how to get the most out of the traditional experience and second to describe ways in which this is being developed into an experience that will be more constructive and prepare future students to build more creative relationships with clients and users and across the industry. While much has been written about the crit review or jury, little has been done to prepare students for it or to develop it in the light of changing professional attitudes and relationships. This book is a timely guide to a timeless experience in a changing profession.

Design Studio Works, Sketches & Essays Kyeong Jae Lee, 2015-02-19 I come from Seoul, Korea, where layers of ancient beauty and high end technology coexist. The city has been evolving swiftly in ways that no single individual can fully comprehend and continues onward toward an exciting but unpredictable future. I have witnessed this change and have felt overwhelmed but inspired by this wild transformation. The pace of change has become a motivation for me to learn more, design more and love more. If a city is a jigsaw puzzle, then creating architecture is like filling in the missing pieces without knowing what the entire picture should look like. I used to be afraid to make a mistake, thinking that a wrong move may stay and stain the beloved city for decades. But then I realized that adding a piece is not just a passive process but a mutually interactive one: the moment I make a move, it generates a new context. This revelation completely changed the way I see the world and emboldened me to be a more proactive, forward-thinking architect.

Through practical case studies, it demonstrates the efficient and proper ways to handle various issues and problems in architectural practice and building design and construction industry.
