crisis through the experiences of two influential groups of architecture students as well as their contributions to design s lexicon The book argues that urban renewal and campus expansion half a century ago recast architectural education at two schools whose host cities New York and New Haven were critical sites for political social and urban upheaval in America The urban challenges of that time are the same challenges rapidly growing cities face today access equity housing and services As architects architects in training and architecture students continue to wrestle with questions surrounding how design may serve a broadly defined public interest this book is a timely assessment of the forces that have shaped the debate
