Architecture For Humanity Haiti:

Humanitarian Architecture Esther Charlesworth, 2014-06-27 Never has the demand been so urgent for architects to respond to the design and planning challenges of rebuilding post disaster sites and cities In 2011 more people were displaced by natural disasters 42 million than by wars and armed conflicts And yet the number of architects equipped to deal with rebuilding the aftermath of these floods fires earthquake typhoons and tsunamis is chronically short This book documents and analyses the expanding role for architects in designing projects for communities after the event of a natural disaster The fifteen case studies featured in the body of the book illustrate how architects can use spatial sensibility and integrated problem solving skills to help alleviate both human and natural disasters The cases include Lizzie Babister Department of International Development UK Shigeru Ban Winner of The Pritzker Architecture Prize 2014 Shigeru Ban Architects and Voluntary Architects Network Japan Eric Cesal Disaster Reconstruction and Resiliency Studio and Architecture for Humanity Japan Hsieh Ying Chun Atelier 3 Taiwan Nathaniel Corum Education Outreach and Architecture for Humanity USA Sandra D Urzo Shelter and Settlements and International Federation of the Red Cross and Red Crescent Societies Switzerland Brett Moore World Vision International Australia Michael Murphy MASS Design Group USA David Perkes Gulf Coast Community Design Studio USA Paul Pholeros Healthabitat Australia Patama Roonrakwit Community Architects for Shelter and Environment Thailand Graham Saunders International Federation of Red Cross and Red Crescent Societies Switzerland Kirtee Shah Ahmedabad Study Action Group India Maggie Stephenson UN HABITAT Haiti Anna Wachtmeister Catholic Organisation for Relief and Redevelopment Aid the Netherlands The interviews and supporting essays show built environment professionals collaborating with post disaster communities as facilitators collaborators and negotiators of land space and shelter rather than as save the world modernists as often portrayed in the design media The goal is social and physical reconstruction as a collaborative process involving a damaged community and its local culture environment and economy not just shelter projects that build houses but leave no economic footprint or longer term community infrastructure What defines and unites the architects interviewed for *Humanitarian Architecture* is their collective belief that through a consultative process of spatial problem solving the design profession can contribute in a significant way to the complex post disaster challenge of rebuilding a city and its community **Architect**, 2010 **Design Like You Give a Damn [2]**

Architecture for Humanity, 2020-12-08 *Design Like You Give a Damn 2* is the indispensable handbook for anyone committed to building a more sustainable future Following the success of their first book *Architecture for Humanity* brings readers the next edition with more than 100 projects from around the world Packed with practical and ingenious design solutions this book addresses the need for basic shelter housing education health care clean water and renewable energy One on one interviews and provocative case studies demonstrate how innovative design is reimagining community and uplifting lives From building material innovations such as smog eating concrete to innovative public policy that is repainting Brazil's urban

slums Design Like You Give a Damn 2 serves as a how to guide for anyone seeking to build change from the ground up Praise for Design Like You Give a Damn 2 StartFragment The resourcefulness of the projects in the book is inspiring its information practical see Stohr s chapter on financing sustainable community development and its numerous factoids sobering TMagazine blogs NYTimes com Resilience by Design Alexandra Jayeun Lee,2016-02-24 This book discusses that disasters whether natural or man made are essentially a human phenomenon When a city becomes gridlocked and its resources depleted the collective resilience of those who remain on the ground becomes critical to its immediate survival and recovery The author argues that in order to build resilient futures for our urban environment we need more than the skills of architects engineers and planners Support of local communities and policymakers is also needed The book revisits the recent catastrophic events the earthquakes in Port au Prince and Christchurch and the hurricane in New Orleans and places emphasis on the social cultural and political processes of rebuilding houses facilities and infrastructure that often go unnoticed Understanding the wider context for how a built project comes to be the author argues is a solid indicator of its longevity than by the measure of its material characteristics alone and gives us reasons to question the validity of our intentions as designers of the future This book provides strategies for thinking about assessing and developing ways for place makers from all disciplines to become responsible citizen designers of our cities Structures and Architecture Paulo J. Cruz,2013-06-27 Although the disciplines of architecture and structural engineering have both experienced their own historical development their interaction has resulted in many fascinating and delightful structures To take this interaction to a higher level there is a need to stimulate the inventive and creative design of architectural structures and to persua □□□□ □,2010 **Sustainable Housing Reconstruction** Esther Charlesworth,Iftekhhar Ahmed,2015-06-05 Through 12 case studies from Australia Bangladesh Haiti Sri Lanka Vietnam and the USA this book focuses on the housing reconstruction process after an earthquake tsunami cyclone flood or fire Design of post disaster housing is not simply replacing the destroyed house but as these case studies highlight a means to not only build a safer house but also a more resilient community not to simply return to the same condition as before the disaster but an opportunity for building back better The book explores two main themes Housing reconstruction is most successful when involving the users in the design and construction process Housing reconstruction is most effective when it is integrated with community infrastructure services and the means to create real livelihoods The case studies included in this book highlight work completed by different agencies and built environment professionals in diverse disaster affected contexts With a global acceleration of natural disasters often linked to accelerating climate change there is a critical demand for robust housing solutions for vulnerable communities This book provides professionals policy makers and community stakeholders working in the international development and disaster risk management sectors with an evidence based exploration of how to add real value through the design process in housing reconstruction Herein then the knowledge we need to build an approach to improve our processes

a window to understanding the complex domain of post disaster housing reconstruction **Beyond Patronage** Joyce Hwang, Martha Bohm, 2016-01-15 Essays projects and interviews will examine emerging forms of sponsorship new forms of connectivity technological or social that produce innovative modes of collaboration and strategies for cultivating relationships that allow us to rethink typical hierarchies between those in power and those in service One could argue that the profession of architecture has traditionally been characterized by patronage Throughout the twentieth century private clients have enabled architects to develop and realize their most significant work Today the landscape of patronage is shifting While the role of private clients is still central to the survival of the profession an increasing number of architects and design practitioners are actively cultivating partnerships with not for profits granting agencies educational institutions and other public organizations How are these broader relationships redefining the role of patronage in architecture Have our current economic ecological and political climates provoked architecture to confront its own priorities and assumptions How can the practice of architecture be shaped not only through relationships of power but also through strategies of empowerment How are emerging practitioners today grappling with issues of inclusion and exclusion in the field **The Rotarian: February 2014** , Ground Rules in Humanitarian Design Alice Min Soo Chun, Irene E. Brisson, 2015-06-15 Delve deep into the complex issues surrounding humanitarian design Ground Rules in Humanitarian Design establishes essential foundations for thinking about humanitarian design and its role in global change Outlining a vital framework for designing for impoverished and disaster stricken communities this informative guide explores the integration of culture art architecture economy ecology health and education Experts on land health water housing education and planning weigh in with best practices and critical considerations during the design process and discussion of the environmental considerations and local materials skills will broaden your understanding of this nuanced specialty Richly illustrated this guide combines graphic documentation of projects maps and data tracking developments from Asia Africa and the Americas to underscore the complexities of this emerging and evolving field The ambition to provide humanitarian architecture for areas in acute need is driving design innovation worldwide among both practitioners and educators This book provides an indispensable resource for those engaged in the search for the sustainable inclusion of cultural code and compassion as a technology for design innovation Learn how to approach the problem of humanitarian design Understand the cultural factors that play into development Develop a new framework for planning post disaster design See how humanitarian design is pushing the industry forward While still in college students are being given the opportunity to directly participate in programmes that provide vital facilities for communities abroad While these international initiatives remain largely ad hoc this book provides parameters for engagement and establishes best practices for approaching these projects with a global perspective With expert insight and practical strategies on the ground Ground Rules in Humanitarian Design is an essential resource for architects at any level
