Linguistics and Language Behavior Abstracts, 2008 Personality and Temperament in Nonhuman Primates Alexander Weiss, James E. King, Lindsay Murray, 2011-08-10 Recently there has been an increased interest in research on personality temperament and behavioral syndromes henceforth to be referred to as personality in nonhuman primates and other animals This follows in part from a general interest in the subject matter and the realization that individual differences once consigned to error terms in statistical analyses are potentially important predictors moderators and mediators of a wide variety of outcomes ranging from the results of experiments to health to enrichment programs Unfortunately while there is a burgeoning interest in the subject matter findings have been reported in a diverse number of journals and most of the methodological and statistical approaches were developed in research on human personality The proposed volume seeks to gather submissions from a variety of specialists in research on individual differences in primate temperament personality or behavioral syndromes We anticipate that chapters will cover several areas The first part of this edited volume will focus on methodological considerations including the advantages and disadvantages of different means of assessing these constructs in primates and introduce some statistical approaches that have typically been the domain of human personality research Another part of this edited volume will focus on present findings including the physiological and genetic bases of personality dimensions in primates the relationship between personality and age how personality may moderate or impact various outcomes including behavior health and well being in captive and non captive environments For the third part of the volume we hope to obtain summaries of the existing work of the authors on the evolutionary importance of personality dimensions and guideposts for future directions in this new and exciting area of research

The Oxford Handbook of Comparative Cognition Thomas R. Zentall, Edward A. Wasserman, 2012-03-20 This comprehensive volume illustrates why an understanding of animal intelligence is essential in disclosing the nature of minds other than our own making it a fascinating volume for anyone curious about the state of modern comparative cognition
